

Empowering the next normal

The future of our schools and colleges – and how we connect and collaborate – is uncertain. As schools start to create new campus strategies, and students look to their management to ensure safe environments, data will become critical to information key decisions for who is where, and when.

Introducing: CommuniFy Back to School

The Responsive Organization

As normal day-to-day operations continue to evolve, campuses need to collect and activate data while providing a safe environment for students. This requires a partnership between students and teachers to drive insights around changing needs of the schools and college campuses with timely responses through:

- Real-time behavioral data and export
- Facilities alerting and automation
- Responsive digital signage and student messaging
- Temperature gating

Empower your students

Students must now be active participants on school grounds and campuses, with new accountability for their health, schedules, and coordination with others. Your tools should provide a platform for this new accountability, reinforcing new behaviors as they become a vital part of the student experience.

- Student digital footprint
- In-person and remote meeting status
- Seat reservation
- Location check-in
- Student finder

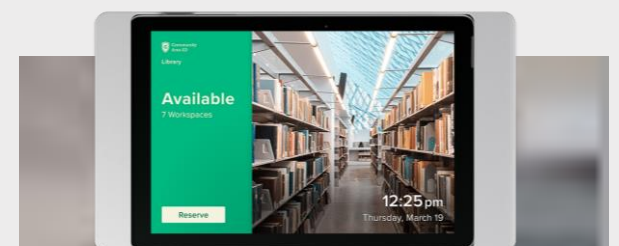

Contact your partner representative to find out how CommuniFy can be part of your institution's Return to School footprint.

CommuniFy Greet: An app deployed on Surface Go with thermal sensor for entrances, lobbies, and reception areas for touch-free first-line temperature scanning of students, teachers, and guests.

CommuniFy Meet: A calendar hall display deployed on Surface Go installed at the entrance of classrooms, meeting rooms, lecture halls and more.

CommuniFy Seat: An exchange-based workspace management system on Surface Go for hotdesking and hoteling.

Uniting CommuniFy is Power Apps 'Return to School' solution. The smart new app is built on the Microsoft Power Platform, which captures and monitors staff and students' health and movements while on-campus.
