Donations for the gift drive are on the 24th floor.

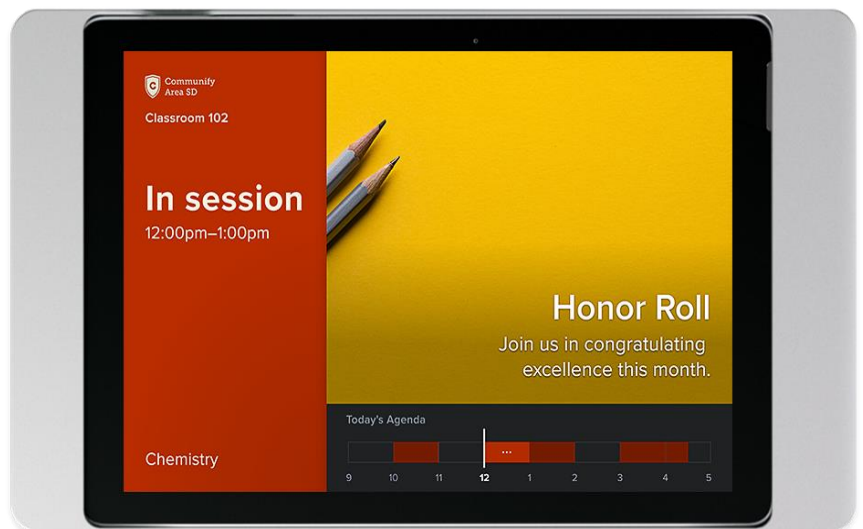

With Communiy Meet, powered by Microsoft 365, schools can take advantage of a fully integrated scheduling experience that is simple, easy to use and cost-effective.

What is Communiy Meet?

In essence, a calendar hall display outside classrooms and other meeting spaces, this room scheduler is easy for staff and students to implement and manage. Schools can focus on learning, not on scheduling. Secure from chip to cloud, Communiy Meet keeps costs down while making life easier for students and teachers to meet and communicate room availability on a companion Surface Go device.

Easier, more secure room scheduling

- Microsoft devices provide an enhanced walk-up experience for teachers, students and visitors with officially licensed enclosures, a brighter, high-resolution display and more digital real estate. Make it easier for teachers and students to connect and collaborate with more space for digital signage and custom messaging, along with room meeting details.
- Communiy Meet is purpose-built for Microsoft devices, leveraging Azure and Microsoft 365 for a fully integrated user and administrative experience.
- The software is easy for IT teams to deploy, manage and secure with modern management tools like Intune, Windows Autopilot Self Deploy, Windows 10 editions for Education and more.
- Students, staff and visitors are assured of secure communications: Communiy Meet, integrated with Microsoft 365 security, is secure from chip to cloud with a secure and compliant TPM and an individual key that chains to the Microsoft Root of Trust.
