Surface Security & Management

Deploy, manage and secure from anywhere

Zero-touch deployment

Built for Autopilot, Surface reduces IT complexity and eliminates time-consuming corporate re-imaging by shipping and deploying straight to your users' hands. Every Surface ships from the factory enabled for Autopilot.

Cloud-first modern management and control

Give users freedom but maintain control with Microsoft Endpoint Manager* and DFCI** for complete and seamless device management down to the firmware layer, with just a few clicks through the cloud.

Built-in is better than bolt-on

Surface + Microsoft 365 provides defense in-depth from chip to cloud all from a single source. From advanced Windows virtualization and Secure Boot enabled by default to intelligent protection from Microsoft 365 Defender, Microsoft provides a single unified solution.

Simplify deployment and management

Remotely manage IT environments

Integration with Microsoft Intune lets you see managed, co-managed, and partner-managed devices in one place.*

Reduce complexity and cost

Gain cost and time savings with Microsoft 365-powered Surface device deployments—from less time with app updates to decreased help desk call times.[1]

Retain your SSDs to ensure data privacy and compliance

Gain the confidence that comes with a removable SSD. Whether it's an end-of-life or service event, retain the Surface SSD and remain in control of your sensitive data.[2]

Increased repairability

Surface lets you choose from a growing network of trusted Authorized Service Providers[3] that deliver effective and secure repair services.

Virtual desktop experiences on Surface

Go from fixed VDI endpoints to modern virtual desktops with Surface.
Using Surface devices to access Azure Virtual Desktop or Windows 365 provides exceptional value spanning user experience, portability, security, business continuity, and modern management.

Windows 10/11* modern device security and manageability.
Secured chip-to-cloud and agile deployment with Autopilot

Online, offline, and on-device access for more productive experiences. Get the best of both worlds without compromising Microsoft zero-trust security or seamless user experience
Persistent, on-demand, and just-in-time work scenarios.
Business Continuity readiness and support for remote and hybrid work scenarios

Flexible form factors with pen, touch, and detachable keyboard. Fully supported with broad Device Redirection support

*Windows 11 coming later this year

Microsoft Surface Management Portal

Centralized solution for IT admins to self-serve, manage and monitor all **Microsoft Surface** devices at scale

Reduce IT cost for the organization
View insights into the health of all Surface devices and get notified about unusual device status

Ability for customers to self-serve
Monitor warranty of all Surface devices and manage support requests initiated with Microsoft with a click of a button

Better post sale experience for managed devices
Get the best of both worlds through seamless Surface device management through Microsoft Endpoint Manager
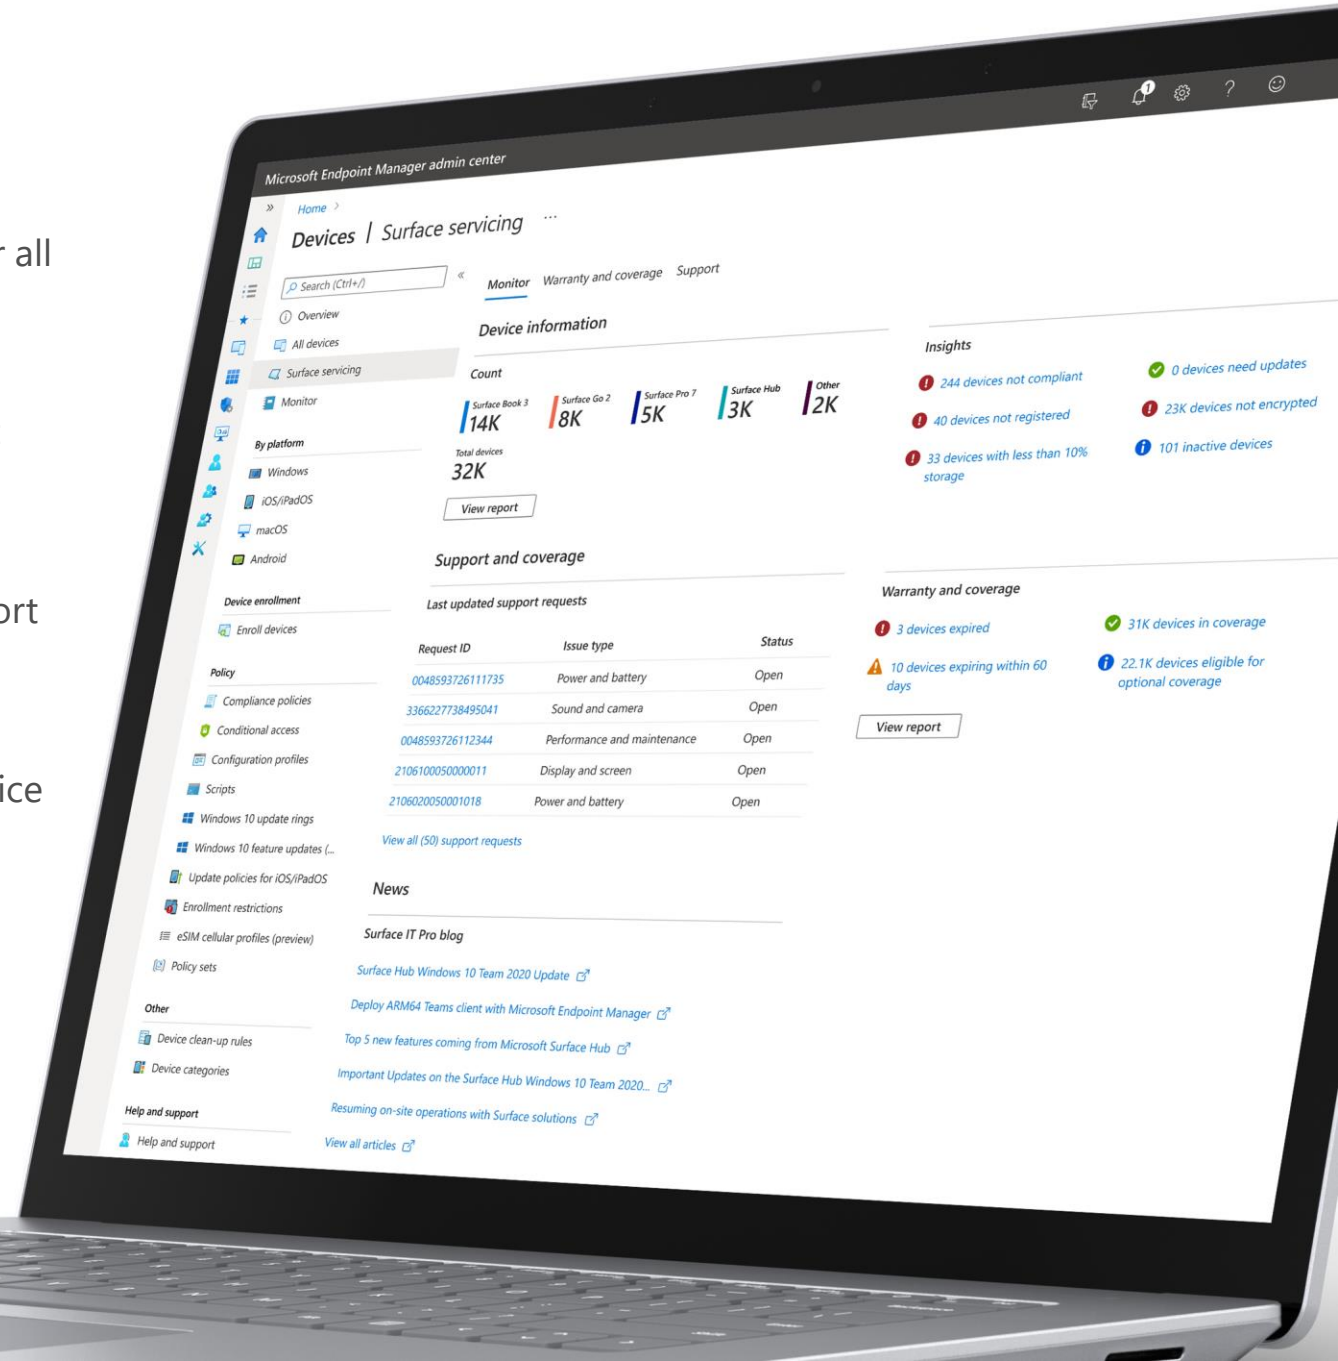

Supports multiple form factors
Supports all Surface devices management through Intune and hybrid managed devices

Receive regular updates
Managing Surface devices is made easier with regular updates to Microsoft Surface Management Portal

Launching in USA this October and available world-wide this year

Microsoft Surface
OS choice

Choose how you take on the hybrid future

Help your employees work the way they want
Choose between either the current Windows 10 or the new Windows 11 operating system. [1]

Reduce IT complexity
Eliminate costly reimaging services by shipping direct from the factory to your employee's doorstep.

Speed up deployment times
Gain time savings with Windows Autopilot zero touch deployments - from less time with app/policy updates to decreased help desk call times.[2]

Increased Supply Chain Security
Factory shrink-wrapped devices delivered direct to your employees already configured with firmware and drivers built and tested for the OS you choose.
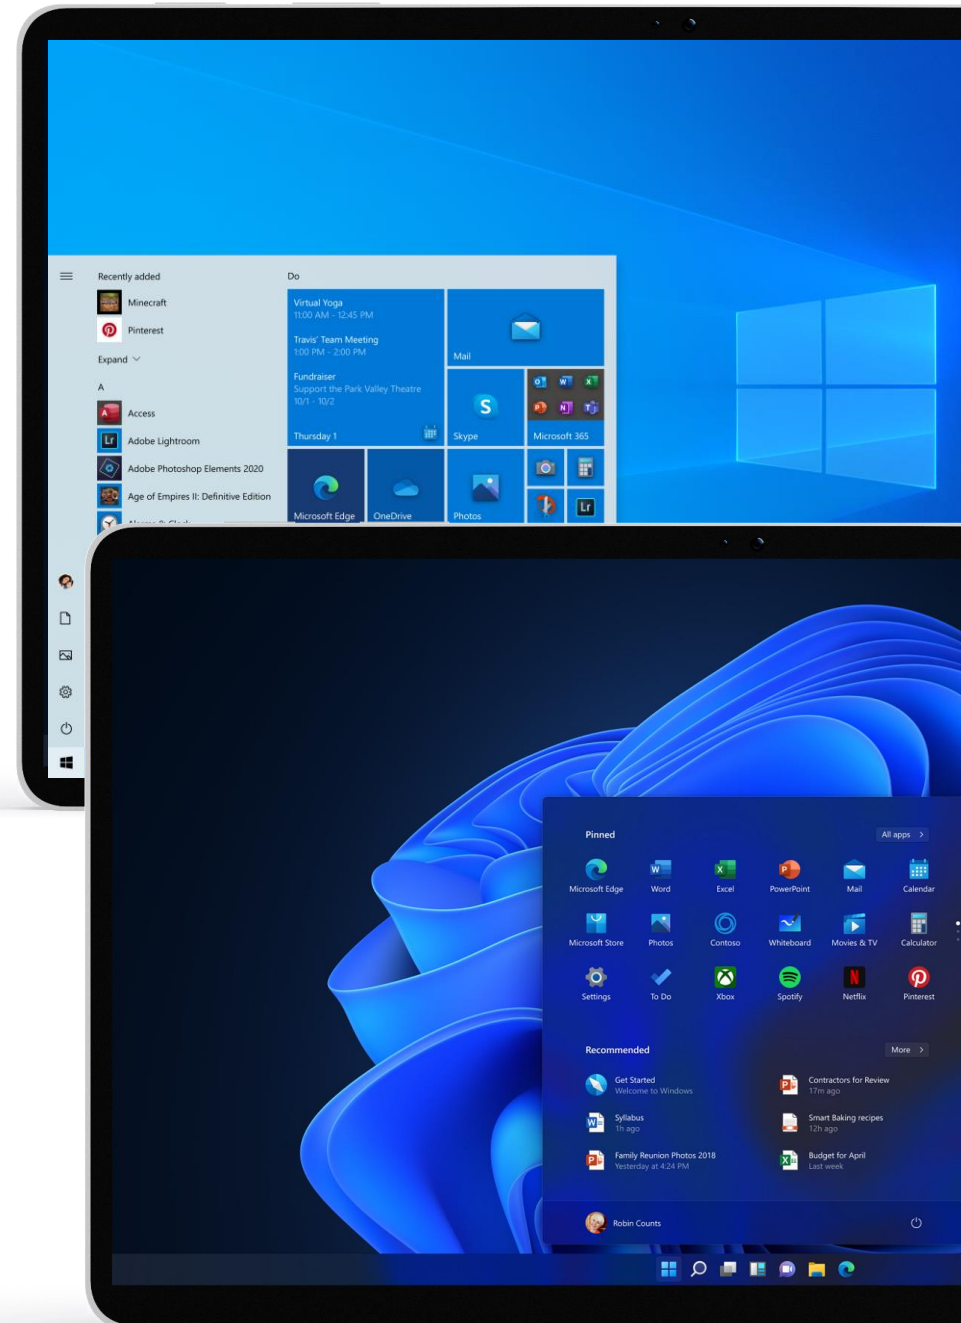

1 Currently, OS choice is available for Surface Pro 8, Surface Laptop Studio and Surface Go 3
