

Two screens. One great decision. Surface Duo.

A new way to get things done.

Mobile productivity, powered by two screens

Open two screens and discover a better way to get things done. View two apps at once or span one across both screens, drag and drop between screens*, and say goodbye to constant app switching on your mobile device.

Find your focus. Open and view different apps on each screen to easily reference and compare content. Say goodbye to constant app switching on your mobile device.

Drag, drop and go.* Effortlessly move images, text, files, and more between screens so you can get things done quicker.

Apps built for two screens. Dual-screen enhanced apps respond to you and magically reorient to make the best use of both screens.

Unique to Surface Duo. Pair and launch any two apps simultaneously, each on its own full screen. It's completely custom to you.

Enterprise-level security from chip to cloud

Surface Duo has protection built in at every layer with deeply integrated hardware, firmware, and software to keep your devices, identities, and data secure.

Microsoft custom engineered UEFI firmware.

Verified Boot ensures system software is not compromised.

Custom fingerprint sensor for Enterprise-grade biometric security.

Hardware-assisted encryption to protect data in transit and at rest.

Apps run in isolated sandboxes to prevent compromises.

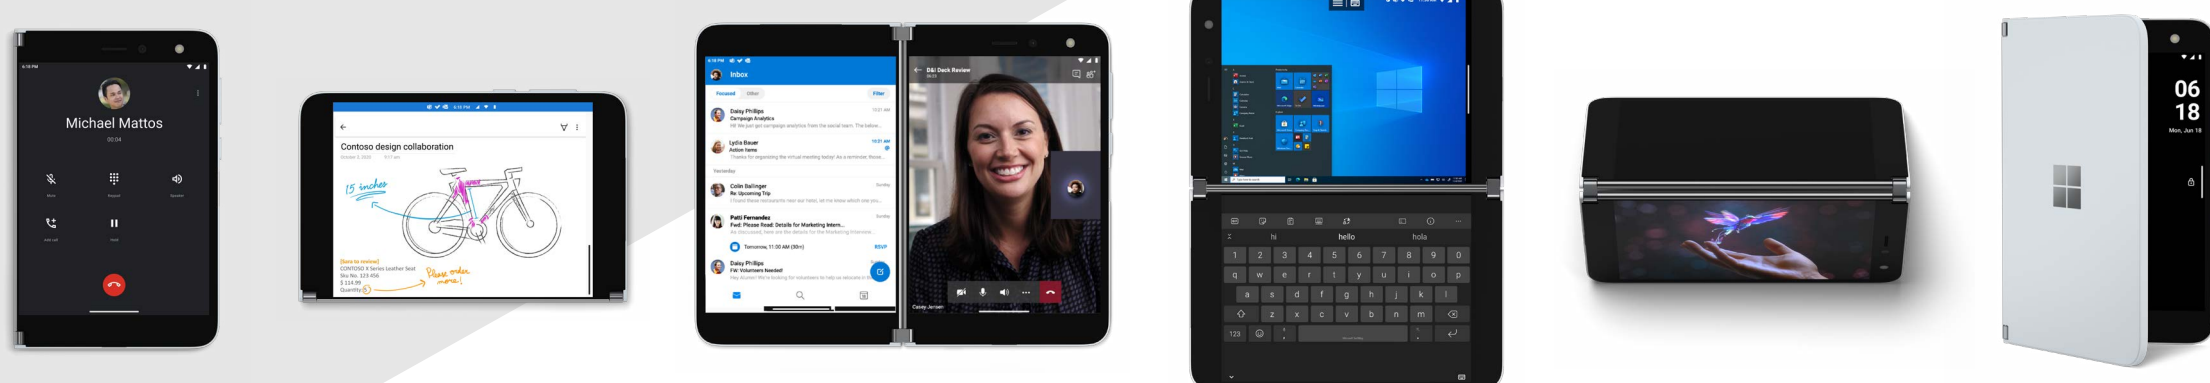

Google Play Protect actively scans apps for malware.

Network traffic protected by TLS and VPN.

Management configurations to separate work and personal data and secure the device.

Flexibility to do more

From Book to Compose to Tent mode, Surface Duo adapts to you. With multiple modes and dual-screen enhanced apps, get things done easily – it's a new way to be productive on the go.
