

New Microsoft Surface Go 3 for Business

Hybrid work is the new normal

But it can be challenging to meet the moment.

Employees want flexible work options and technology that doesn't complicate their lives.

Teams need better tools for remote collaboration and productivity.

IT environments are complex, with more outside devices connecting to internal networks.

Remote provisioning, deployment, and management of devices are becoming standard.

Privacy and cyber threats require more advanced security across devices, users, apps, and their data.

Meet the new Surface Go 3 for Business

Full-access flexibility
for your frontline

Serve your customers better on the frontline with faster, ultra-versatile, and always-connected Surface Go 3. Speed through email, access records, and respond to requests on our smallest, most portable Surface PC—that's also a tablet. And do it faster than before, with an Intel® Core™ i3 Processor, built-in Microsoft security, and, coming soon, optional LTE Advanced.¹

Flexibility for every task

Work your way with touch, handwriting, typing, photos, and video consults.

Tackle touch-and-ink tasks in Tablet mode with touch and Surface Pen.* Type up reports in Laptop mode using the Surface Go Signature Type Cover.* Write and sketch at a natural angle in Studio mode.

Capture documents, photos, and videos from the job site in high definition with rear-facing 8.0 megapixel HD camera.

Hear, be heard, and put your best face forward with Dolby Audio™ speakers, Studio Mics, and a front-facing 5.0 megapixel HD camera.

Connect via the included USB-C® port, Surface Connect port, and headphone jack with accessories you're using today.

Designed for workforces on the go

Surface Go 3 delivers portability and full-access flexibility.

Travel light and perform fast, with a 2-in-1 that starts at just 1.2 lb.¹ and an Intel® Core™ i3 Processor.

Get signatures, process sales, and speed through intensive tablet-and-digital pen tasks using the touchscreen and Surface Pen.*

Tune in to virtual team meetings or learn new skills in how-to videos with the high-resolution 10.5" PixelSense™ Display with 220ppi resolution.

Get all-day battery life up to 11 hours,² plus Fast Charging to take you from low to 80% in less than 1.5 hours³ when you do need to plug in.

Get the job done from shop floor, job site, or exam room

Workforces that are far afield or roaming between offices deserve devices that help them be their best. Microsoft Surface Go 3 provides your frontline employees with the flexibility and mobility they need—so they can delight your customers.

A portable device worthy of your desktop

Go from field to focus with a 2-in-1 that adjusts to your needs.

Get a full laptop experience with Surface Go Signature Type Cover.* Enjoy fast, fluid typing with a mechanical keyset and backlit keys, and navigate easily and precisely with an extra-large glass trackpad.

Create a remote office setup with Azure Virtual Desktop or Windows 365. Connect Surface Dock 2* to view your work on up to two 4K external monitors.

Work seamlessly with Windows plus essential Microsoft 365* and Dynamics 365* apps to follow up with customers, generate reports, and plan your next client visit.

Stay connected, respond faster

Surface Go 3 helps keep lines of communication with your customers open.

Speed through email, access records, and respond to customers faster than before with a 10th Gen Intel® Core™ i3 Processor.

Leverage the productivity of Microsoft Teams, OneNote, Outlook, and other essential Microsoft 365 apps.*

Access stable connectivity with fast Wi-Fi 6 and optional, secure LTE Advanced¹ in areas with unsecured public, slow, or no Wi-Fi (coming soon).

Resume work quickly and securely using an NFC badge, facial recognition, a PIN, or multi-factor authentication through Windows Hello.

Deploy, manage, and protect from anywhere

Built to reduce complexity

Keep company information and customer data safe, whether devices are onsite or in the field.

Get the most from Microsoft 365,* with Windows 10 or Windows 11 Pro, the protection of Microsoft Enterprise Mobility + Security, and the productivity apps you rely on every day.

Gain more control with cloud-first device management using Microsoft Endpoint Manager* and DFCI.¹

Simplify IT with zero-touch, Windows Autopilot deployment straight to employees.

Restrict access to only the apps and tools customers or employees need in Kiosk Mode.
