Microsoft Surface

Reimagining the future of work with Microsoft Surface

Surface devices optimize the software and cloud solutions businesses rely on every day by providing a scalable, secure, and innovative solution that empowers you to do more—so your business can thrive.

Work productively from anywhere
Deliver more flexible options without sacrificing productivity for your workforce, no matter their location.

Stay connected and collaborative
Empower employees to accomplish more with always-available collaboration tools powered by Microsoft 365 running on Surface.[1]

Modernize device management
Synchronize and deploy Surface firmware and driver updates with Microsoft Endpoint Configuration Manager within the Configuration Manager client.

Deploy with less complexity
Reduce IT complexity and streamline device management and deployment using Windows Autopilot zero-touch deployment and unified management.

Maintain security from chip to cloud
Manage devices in the cloud right down to the firmware level, and maintain secure control with a Device Firmware Configuration Interface (DFCI).[2]

Realize business cost savings
Choose a cost-effective solution that provides a 170 percent return on investment, over three years, with a 14-month payback period and 10-hour-per-week productivity gain per user.[3]
