

# Isn't it time you made the move to **modern endpoint management?**

Microsoft Surface device-management solutions can help you do more with less risk, less complexity, and fewer resources.

Managing endpoint complexities while helping ensure that hybrid and remote workforces always have seamless, easy access to information can be challenging. Microsoft Surface devices make modern endpoint management possible by helping you to:

## Increase efficiency

**Streamline** device deployment and management.

Easily manage the entire device lifecycle, from deployment and provisioning to device end of life, simplify IT tasks, and get a comprehensive view across endpoints.

## Reduce risks

**Simplify** endpoint management and enhance security capabilities.

Manage and monitor mobile devices, desktop computers, virtual machines (VMs), embedded devices, and servers. Combine Microsoft 365 stack services to better secure access, protect data, and respond to and manage risks.

## Improve value

**Save** time and reduce complexity.

The potential return on investment (ROI) that enterprises can realize by implementing Microsoft 365 Enterprise on Microsoft Surface devices is notable, according to a [Forrester Consulting Total Economic Impact study](#).<sup>1</sup>

It's time to make a move to modern device endpoint management that is efficient, simple, and cost effective.

It's time to learn more about **Surface for Business**.
