

Designed for work. Optimized for education.

“Microsoft Surface devices are the best way to experience Microsoft 365 and the rest of the Microsoft ecosystem, including the security tools and services.”

Stuart Brown - Chief Digital and Information Officer, [University of Reading](https://www.reading.ac.uk/)

The University of Reading standardised on Microsoft Surface devices for all staff and invested in Surface for students to enable a device loan scheme in the library to widen digital inclusion. The University of Reading team enhanced the staff and student experience in a variety of ways and is confident that Surface is the right choice for financial and environmental sustainability.

“We could reduce complexity, the devices would be easier to manage and, ultimately, that makes the Microsoft Surface Laptops more cost effective overall.”

Ed Spick – Director of Information & Technology Services, [London Metropolitan University](https://www.londonmet.ac.uk/)

“We [included] Surface Hub...to provide unique ways for faculty to engage and highlight content. Surface Hub marries nicely with Teams in Teams Rooms, and faculty are digging in and really enjoy using the devices.”

Dr. James Raber – Executive Director of Support Infrastructure and Research Technology, [Kent State University](https://www.kentstate.edu/)
