ThinkAgile HX Series for Small and Medium Businesses
Simple, scalable HCI building blocks for SMB

SMB's Unique IT Needs

With 1,000 or fewer employees, many small and midsize businesses (SMBs) cannot afford an IT staff or even a dedicated IT manager. Because of resource constraints, they need systems that are not only easy to learn, manage and maintain, but that also incur low operational expenses.

A smaller company's onsite server often plays a more critical role in the success of the business than a high-end server located in a large enterprise's data center. If the smaller company's server fails or is shut down, its business may grind to a halt. That's why major data losses and security breaches can be especially devastating to SMBs.

Right-Sized HCI Building Block for SMB

Lenovo understands that SMBs have unique IT needs. Together with Nutanix, the leader in hyperconverged software, Lenovo has added a new SMB-tailored product to the Lenovo ThinkAgile HX portfolio.

The ThinkAgile HX2320 appliance and ThinkAgile HX2321 Certified Node leverage the same winning recipe of ThinkAgile HX: Nutanix's leading enterprise Cloud OS hyperconverged software preloaded, validated, and optimized on Lenovo's highly reliable and high-performing platforms.

The ThinkAgile HX2320 and HX2321 (HX2320 Series) offerings enable SMBs to:

- **Scale to meet business needs** . The ThinkAgile HX architecture collapses compute and storage into a single virtualized pool, via an x86 building block. This lets you shrink your server footprint, maximize resources, and scale easily by adding more HX nodes as your business grows.
- **Simplify IT management and operations**. Use Nutanix Prism for one-click planning, provisioning, insights, and firmware updates to reduce the complexity and hassle of your IT operations. Lenovo XClarity and the ThinkAgile XClarity Integrator for Nutanix, intuitive hardware resource management tools, can be used in concert with Prism for comprehensive management.
- **Maximize business uptime**. Designed for SMBs, the ThinkAgile HX2320 Series incorporates enterprise features to maximize uptime and reduce your expenses. For example, the HX2320 platform sends proactive platform alerts to XClarity, which can then notify the IT administrator of a failing part before it occurs to avoid unplanned downtime.

With the ThinkAgile HX2320 Series, you can run your enterprise applications with 24/7 availability. Start small and scale as your business grows.

## Specifications - ThinkAgile HX2320 and HX2321

	Small and Midsize Businesses
Model Name	HX2320 (appliance) and HX2321 (certified node), 1U form factor
Processor	2x second-generation Intel® Xeon® Silver and Gold processors, up to 85W
Memory (TruDDR4 2933MHz)	96GB, 192GB, 256GB, 384GB, 512GB, 576GB, 768GB, 1024GB, 1.5TB
Drive Bays	4x 3.5″ drives
SSD Options (Hybrid)	2x 480GB, 800GB, 960GB, 1.6TB, 1.92TB, 3.84TB
SSD Options (Flash)	2x or 4x 480GB, 800GB, 960GB, 1.6TB, 1.92TB, 3.84TB
HDD Options	0x-2x 1TB, 2TB, 4TB, 6TB, 8TB, 10TB
Dual-port NIC (10GbE/10GBASE-T)/25GbE	2 ports standard; 2-4 additional optional/0-2
Hypervisors Preloaded/Supported	Nutanix Acropolis Hypervisor; optional VMware ESXi (4Q/2019) / Nutanix Acropolis; VMware ESXi, Hyper-V 2016
Systems Management	Software management via Nutanix Prism, hardware management via Lenovo XClarity and Lenovo XClarity Integrator for Nutanix
License Options	Nutanix Starter, Pro, or Ultimate**
Deployment Services	Lenovo Professional Deployment services available
Warranty Support	Lenovo 3-year, 4-year, or 5-year limited hardware warranty, ThinkAgile Advantage Single Point of Support where available

About Lenovo

Lenovo (HKSE: 992) (ADR: LNVGY) is a US$45 billion Fortune 500 company and a global technology leader in driving Intelligent Transformation. Lenovo's data center solutions (ThinkSystem, ThinkAgile) are creating the capacity and computing power that are changing business and society.
