ThinkPad

Smarter technology for all

Lenovo

The first Copilot+ PC from Lenovo ThinkPad with 40+ TOPs capability, the sleek and ultrathin Lenovo ThinkPad T14s Gen 6 brings to life the convergence of next-level productivity and laptop portability. The premium user experience mixes a minimalist design with a simplified interior, enhanced accessibility, and best-in-class sustainability for design without compromise. Plus, with Microsoft Windows 11, this Copilot+ PC delivers local AI processing, so intelligent efficiency has never been more secure.

Powered by up to Snapdragon® X Elite, this Lenovo ThinkPad sets the standard for a new generation of AI PCs with game-changing performance and power efficiency. Thanks to the brilliant 2.8K OLED display with 87.9% screen-to-body ratio, the 5MP + IR MIPI camera, and Dolby Audio, users enjoy an immersive sight and sound experience. And for unyielding on-the-go productivity, this do-it-all device boasts Wi-Fi 7 to enable faster and less-congested bandwidths, along with always-on 5G sub6 connectivity and a lightweight 58Wh battery for multi-day unplugged power.

X-ELITE PERFORMANCE

Tap into AI capabilities like Large Language Models (LLMs) without the vulnerabilities of cloud-based processing. Built to unlock the potential of emerging AI applications for the modern workplace, Snapdragon X Elite is the most powerful, intelligent, and efficient platform ever created for Windows in its class. With game-changing performance and multi-day battery life[1], it helps workers across industries become more focused, productive, and innovative. Integrating with the best AI apps, this Lenovo ThinkPad Copilot+ PC enables users to stay offline while boosting efficiency and privacy, creating faster content and video output. Plus, with zero-touch provisioning support and modern deployment workflows, the Snapdragon X Elite is engineered to meet the needs of today's IT teams and the hybrid workforce.

ENTERPRISE READINESS

This laptop has redefined enterprise ready. Lenovo is the trusted Windows on Snapdragon enterprise partner, with more than six years of customer engagement to shape the AI PC future. The result? Best-in-class performance to harness the power of local AI for faster, more efficient productivity. Powered by the Snapdragon X Elite, this Lenovo ThinkPad truly gives you the enterprise edge, with chip-level safeguards that defend against sophisticated threats and eliminate risks by keeping AI prompts and interactions on the device. As the AI PC evolution continues to advance, security it a top concern. So, Lenovo's ThinkShield Security Suite safeguards businesses and users with end-to-end protection from supply chain through software and hardware engineering to delivery.

BATTERY EFFICIENCY

The new Snapdragon X Elite and Windows on Snapdragon combine to be an optimal solution for battery efficiency, running applications using less wattage and extending battery life. Because this Lenovo ThinkPad boasts the most efficient processor on the market today, remote workers can stay productive from anywhere—no plugs needed. Another industry first from Lenovo, 3M™ optical solutions, increases display brightness by 33% while lowering power consumption by 16%. Efficiency meets responsibility, as this Qualcomm-powered device is engineered with the lowest carbon footprint in the ThinkPad portfolio and is designed with a Field Replacement Unit (FRU) battery for enhanced repairability.

[1] Based on a 24-hour day; battery run times will vary based on applications and conditions.

Lenovo Sustainability Services

Partner with Lenovo to implement more sustainable, cost-efficient practices across the device lifecycle and make a meaningful difference in how you use technology.

LENOVO TRUSCALE DEVICE AS A SERVICE (LENOVO TRUSCALE DAAS)
This subscription model is an efficient way to manage your fleet of end-user devices, optimizing resources and costs while promoting circularity. Deploy just what you need and responsibly dispose of what you don't. Supported by our suite of services, TruScale DaaS helps you prolong device usability and create a more sustainable end-to-end journey for your IT assets.

LENOVO CO_2 OFFSET PROGRAM
While minimizing and eliminating emissions is always the goal, carbon offsetting your IT fleet is another way to help manage your overall carbon footprint. We make it easy with a seamless, transparent process for Lenovo devices across your current IT fleet or new purchases—with a sustainability dashboard to view the offset metrics. The offsets are contributed to climate action projects verified by independent third-party organizations like the United Nations, CDM, Gold Standard®, and Climate Action Reserve.

LENOVO ASSET RECOVERY SERVICES
Hardware-agnostic Lenovo Asset Recovery Services (ARS) help mitigate end-of-life IT and data security risks. We reuse parts, refurbish devices, and recycle assets. Buy-backs help you fund future IT investments. And Lenovo PCs and infrastructure hardware can get a new lease on life through Lenovo Recertified Services.

Lenovo ThinkPad T14s Gen 6

Committed to sustainability

At Lenovo, we're focused on providing smarter technology that builds a brighter, more sustainable future for our customers, colleagues, communities, and the planet. We're determined to build a smarter future for all through the products and services we offer.

As we continue innovating to provide technology solutions that are more energy efficient and human-centered like the Lenovo ThinkPad T14s Gen 6, we stay focused on empowering you to meet your own sustainability goals—and solve humanity's greatest challenges.
