Let's Come Together Again

TrackMy® VeriVax offers a first to market, comprehensive vaccination verification technology integrating with all 50 states. Our solution has been leading the charge in electronic passports since late 2020 before mandates were being issued. The technology has evolved and grown to more significantly support the reopening of events by keeping employees, sponsors, and attendees safer in all environments.

Why Events Need TrackMy® VeriVax

Integrated into all 50 state databases for verification of shots and COVID tests.

Insightful and actionable data for organizations to use for policy decisions.

System ensures accurate, unerring verification - a solution for forged vaccination cards.

Customizable with questionnaires, demographics, and access management/security integrations.

Vaccine administration, dosing, and Covid test results verified with state registries in real time.
