

VisualC3 Professional Monitoring Case Study

A complete, professional monitoring solution for your business!

At a glance

VisualC3 provides an inexpensive and comprehensive solution for low-income housing facilities looking to provide peace of mind to residents and their families, without the need for expensive hardware or lengthy installation processes.

Key metrics

Reduce Response Time

Improved avg. response at this location from ~5 hours to <10 mins

Thousands

monitored GuardMe sessions completed already.

Hundreds

of families provided with peace of mind already.

CHALLENGES

In 2022, a nonprofit developer of low-income housing facility wanted to increase the safety of a rental community providing apartments to victims of domestic violence. To address the needs of these families, management increased the security for this property by installing cameras and maintaining a professional monitoring service to monitor any unusual activity. The goal is to give these families peace of mind and enhance personal safety.

SOLUTION

VisualC3 was designed to provide personal safety by keeping people connected and safe. The panic feature instantly provides location data to enhance visibility and streamline response time. Residents can send an alert to the central dashboard with one click and immediately receive assistance. To improve overall security and personal safety of residents, the internal property management team and remote guard service were configured to be notified of any alerts. VisualC3 revamped this organizations security posture in less than a week.

Peace of Mind

Easy Scalability

BENEFITS

1

Cost Effective

VisualC3 utilizes your mobile phone to avoid expensive hardware installation costs typically associated with other professional monitoring services.

2

No Maintenance Required

Software updates and system maintenance is entirely managed remotely by the VisualC3 team, so no need to worry about maintenance windows and down time.

3

Simple to Use

Our highly proactive and simplified, timer-based monitoring sessions and our quick action panic button feature allows users to open their phone and immediately connect to help in an emergency.

Keeping you connected and safe.
