

Glass Enterprise Edition 2: A hands-free device for smarter and faster hands-on work.

Wearable Technology

Glass Enterprise Edition 2 has helped workers in a variety of industries—from logistics, to manufacturing, to healthcare, to field services—do their jobs more efficiently by providing hands-free access to the information and tools they need to complete their work.

Logistics

Increasing Operational Efficiency

At DHL, there is a supply chain process called “order picking” where employees fulfill customers’ orders by scanning items from racks before moving them into totes or bins on carts.

Using Glass with a partner solution, pickers now receive all picking instructions directly from Glass, right in their line of sight. With “Vision Picking” freeing their hands of paper instructions, real-time picking instructions, and the scanning function of Glass, pickers can work far more efficiently and comfortably.

The result?

DHL achieved 15% greater operational efficiency on average.

Healthcare

Enhancing the Patient Experience

Patients should receive doctors’ undivided attention during office visits. By using Glass and a partner solution, Sutter Health liberates doctors from the hours of documenting and charting health histories and medical conditions so they can spend more time doing the work they love – taking care of patients.

The result?

Doctors saved an average of two hours per day increasing visit numbers without sacrificing quality of care.

Manufacturing

Enabling Greater Productivity

GE partnered with Upskill to implement the Skylight platform with Glass in warehouses and manufacturing facilities globally. At Renewable Energy in Pensacola, Florida, wiring technicians experienced a significant increase in productivity and meaningful quality improvements while assembling wind turbines using Skylight with Glass.

The result?

Upskill increased efficiency by 34% in the top box

Benefits

Stay focused

Glass intuitively fits into your workflow and helps you remain engaged and focused on high value work by removing distractions. Using voice commands, you can activate the right application for you at any time.

Improve accuracy

Access training videos, images annotated with instructions, or quality assurance checklists that help you get the job done, safely, quickly and to a higher standard.

Stay focused

Glass can connect you with coworkers in an instant, bringing expertise to right where you are. Invite others to “see what you see” through a live video stream so you can collaborate and troubleshoot in real-time.
