One of a Kind Devices for Every Kind of Work

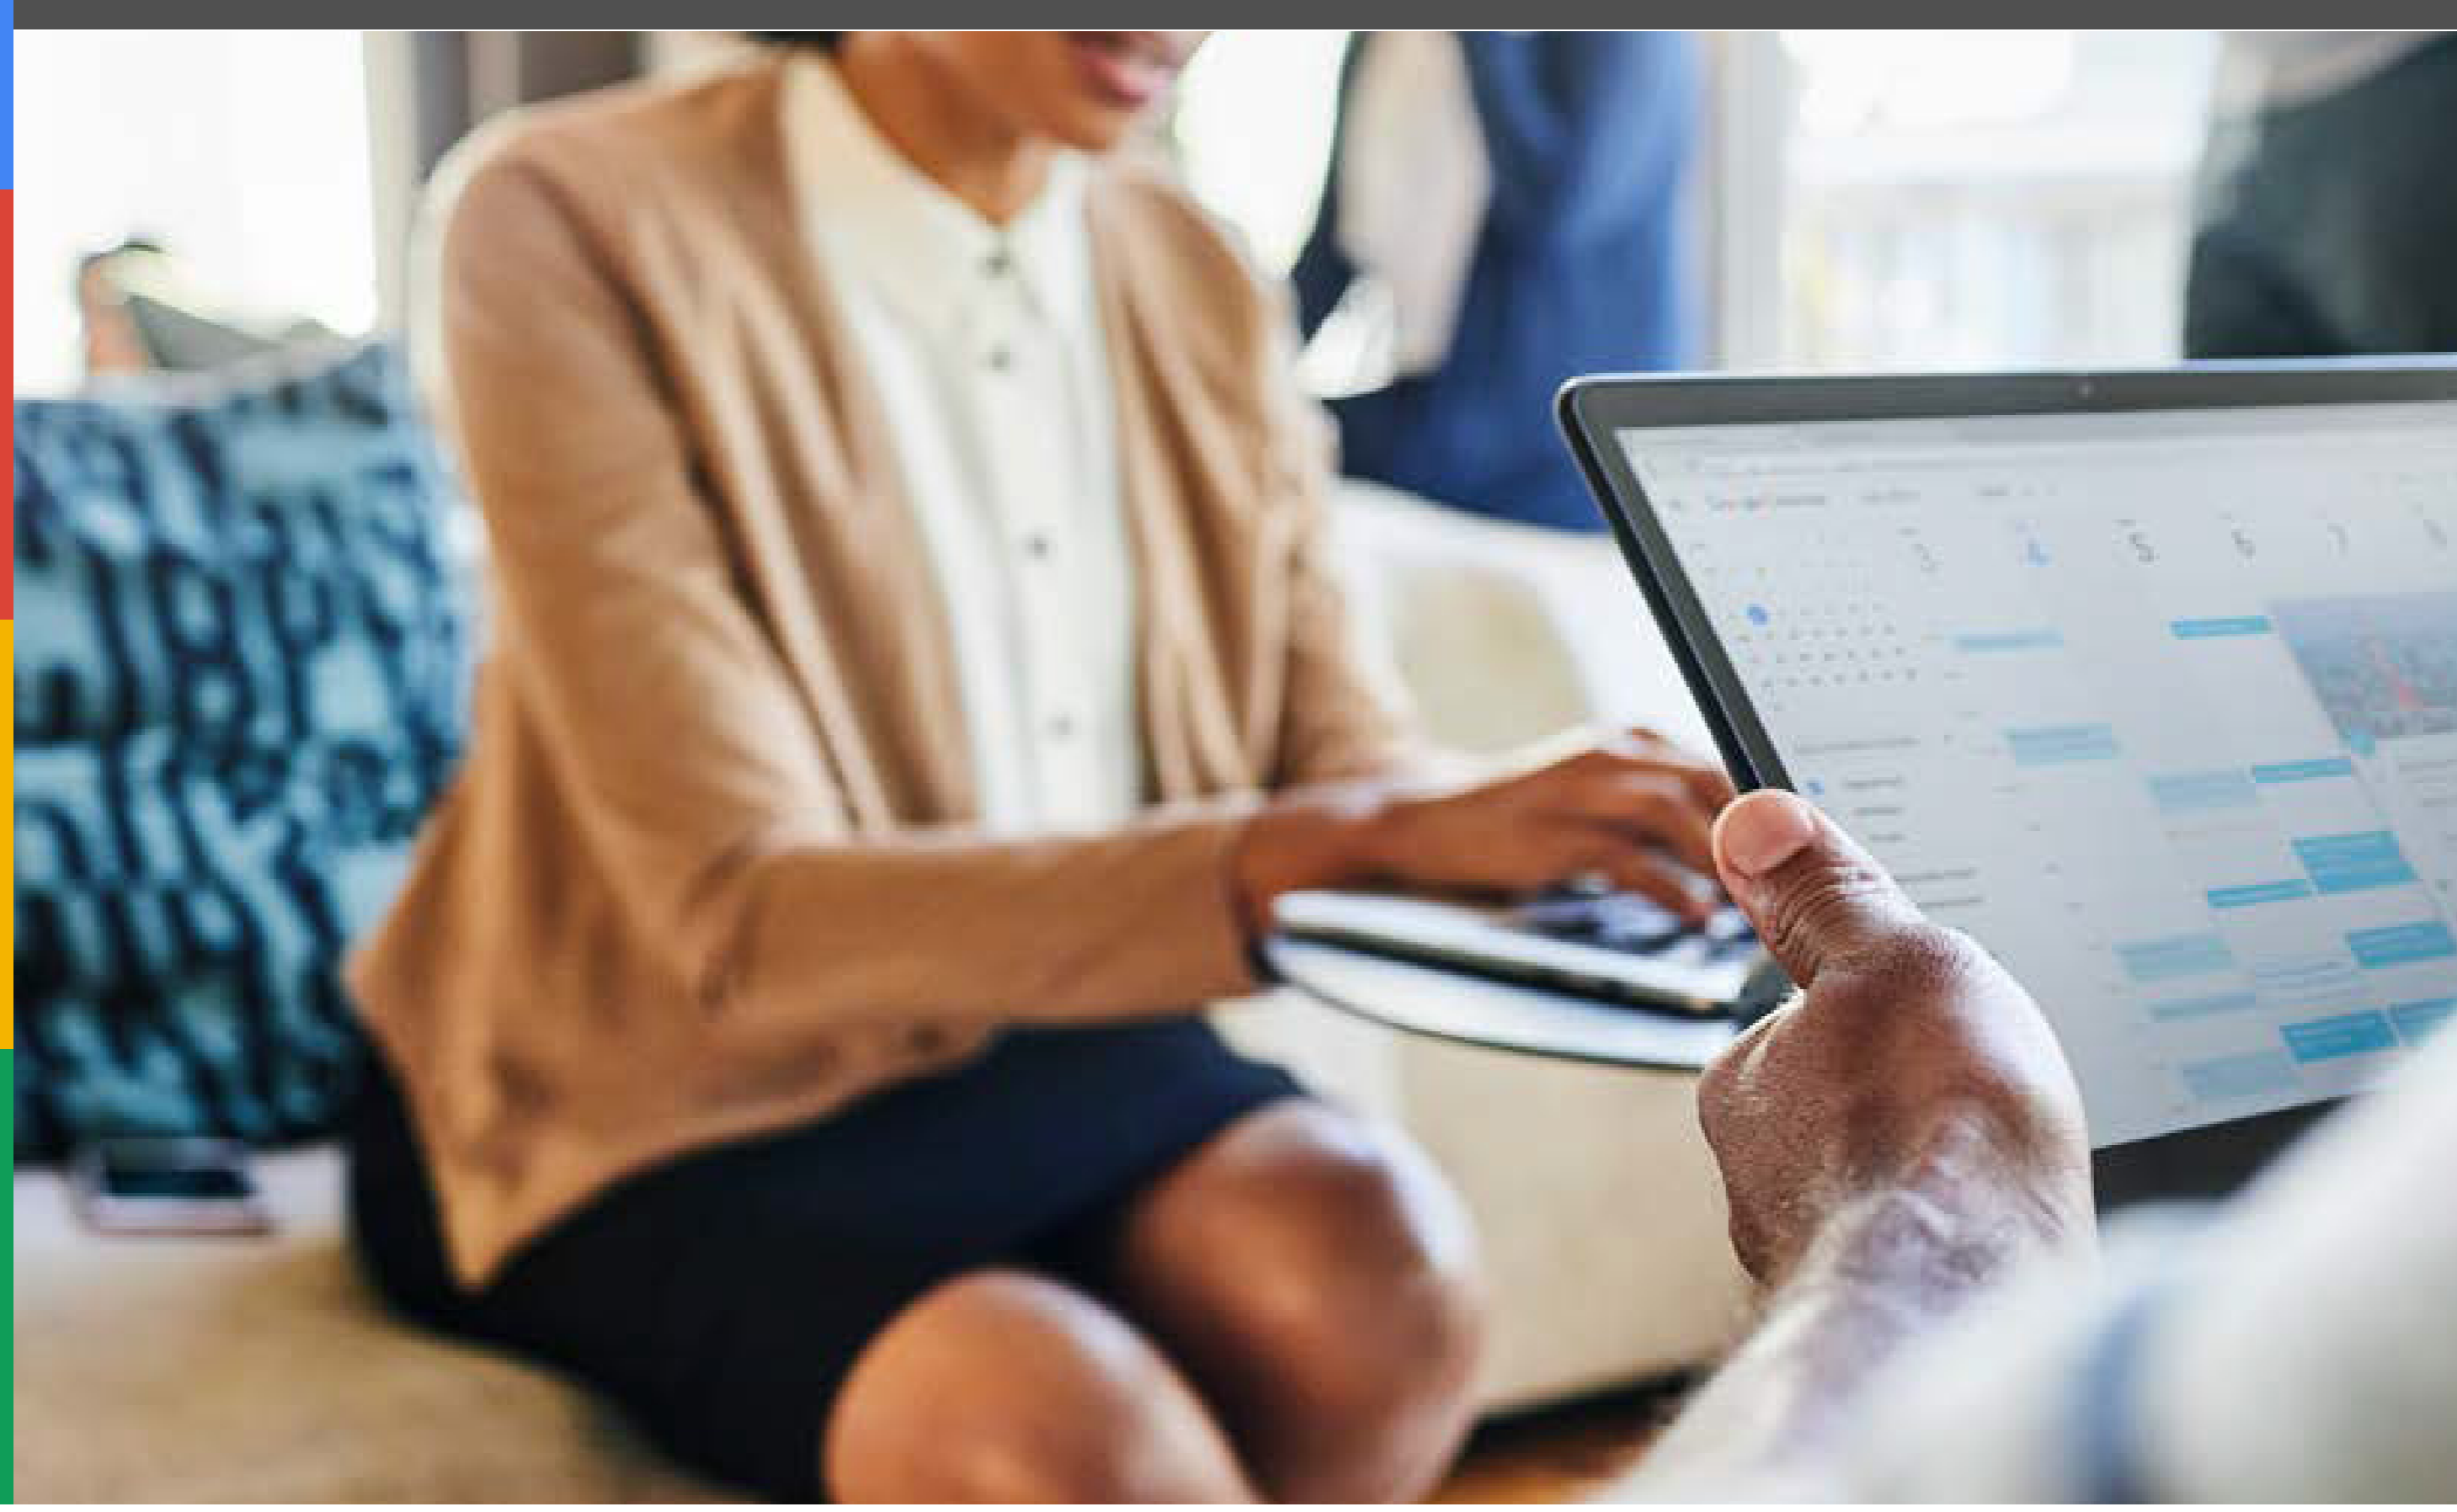

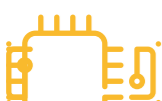

Why Google Hardware?

SMART SECURITY
Google Hardware provides multilayered security via trusted apps and built-in security keys—enabling IT to protect employees against current threats.

SIMPLIFIED MANAGEMENT
Easily manage numerous devices from one central console. Set company policies, collaborate with G Suite, get 24/7 support, and deploy a fleet of devices remotely.

LASTING INVESTMENT
Longer device life, reduced admin costs, and ease of management help minimize your total cost of ownership while maximizing productivity.[1]

THOUGHTFULLY ENGINEERED
Google Hardware features the latest processors and a versatile design for workers who want portability without sacrificing power.

Google Pixel Slate

Thoughtful modern computing for you.

Behind the sleek, versatile design, Pixel Slate enables you to work and play smarter.

Benefits include:

Molecular Display™ for the sharpest picture
12.3' Molecular Display™ comes with 293 ppi and 6 million pixels. Plus, premium audio with dual front-firing speakers.

Intel® processor
8th Gen Intel® Core™ m3, i5 or i7 Processor to power your customers' favorite games or apps.

Long-lasting battery. Fast recharge.
When your customers need a boost, they can get up to two hours of power with a 15-minute charge.

Thin and lightweight design
Only 1.6 pounds and 7 mm thin, the Pixel Slate is easy to carry or fit into a bag.

Pixelbook Go

Pixelbook Go is the Chromebook that goes anywhere, and keeps going.

Designed for businesses that need an ultra-portable, secure laptop with a long battery life, the Pixelbook Go is built to go anywhere.

Benefits include:

Made to move
At two pounds light and 13 mm thin, the Pixelbook Go was designed for life on the go.[2]

Good to go
Delivers up to 12 hours of power and quick charge delivers 2 hours of battery life with just 20 minutes of recharge.[3]

Speed through and through
Powered by the fast and responsive 8th Gen Intel® Core™ Processor (m3/i5/i7).[4]

Security built-in
Built-in virus protection. Updates automatically in the background to provide the latest security. Titan™ C security chip protects information, device passwords and operating system.
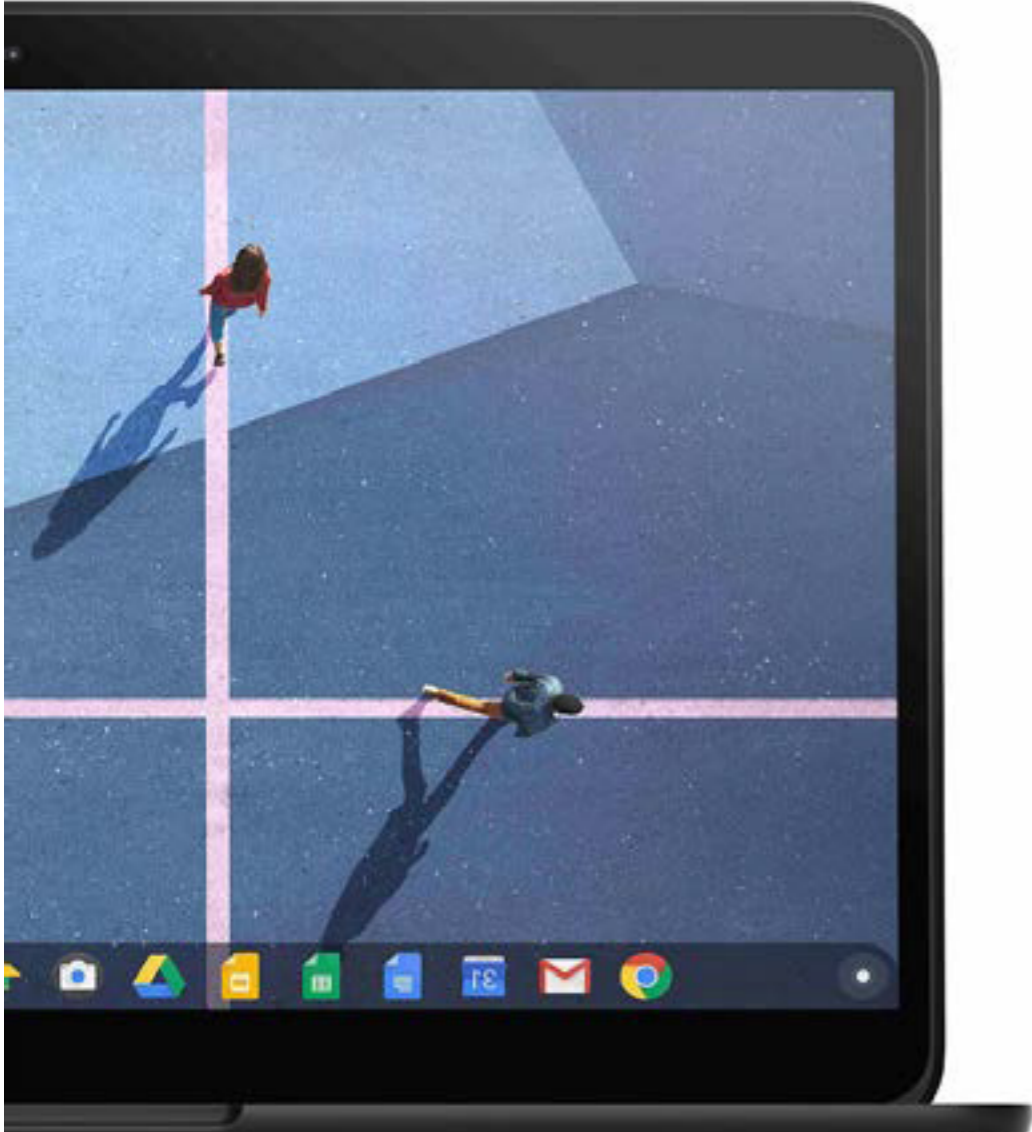

Mobile Devices

Premium Devices That Work Together
Google devices merge the best of Google hardware, software and artificial intelligence so you can work and play harder.

Google Pixel 4

Ready for business
With the Google Pixel 4, you get security by design, ease of device management, and the helpful assistance of Google at your fingertips.

Security by design
With Google Pixel 4, you will have the latest innovations in security from Google's hardware and software for at least three years, like the Titan M security chip and automatic updates.[5]

Easy support through seamless management
Pixel 4 provides the perfect environment with intuitive enterprise management capabilities that make set up easy and ongoing management even easier.

Designed for the user with helpfulness in mind
Pixel 4 is the phone made the Google way. So it's built around the helpful Google software you know and love, that's always getting better.

AI Integration

Artificial Intelligence at Work

Smart Photography
The software in Pixel 4 helps users take studio-like photos anywhere. There's nothing new to learn and no editing required.

Call Screen[6]
Google Assistant helps you filter out spam before your phone ever rings. And when it does ring, you can find out who's calling and why before you pick up.

Google Lens
Users can scan business cards directly into their contacts, add events to their calendar, use Google Translate with one click and more.

Live View in Google Maps
With arrows and directions placed right on top of your world, you can quickly find where to go. There's no second guessing or missing a turn.[7]

Google Assistant
The fast and easy way to control your phone and get stuff done, like searching YouTube, sharing photos, and more.[8]

Wearable Technology

Glass Enterprise Edition
A hands-free device for smarter and faster hands-on work

Glass Enterprise Edition has helped workers in a variety of industries—from logistics, to manufacturing, to healthcare, to field services—do their jobs more efficiently by providing hands-free access to the information and tools they need to complete their work.
