

Webex App

One app for every type of collaboration

Meet your workforce collaboration needs with a single, unified app for calling, meetings, and messaging. Webex App empowers people to work flexibly while providing industry-leading security and privacy.

Empowered workforce

Level the playing field for your hybrid workforce by providing equitable and inclusive experiences.

Flexible workstyles

Give your employees the flexibility to collaborate and communicate from anywhere, anytime and any platform.

Frictionless workflows

Enable your workforce to collaborate and communicate continuously synchronously and asynchronously.

Calling

Keep colleagues and customers close with a cloud phone system built to make and receive business calls on any device. Experience enterprise-grade calling features and crystal-clear audio and video with robust security that is globally available.

Meetings

Create more engaging and inclusive meetings that bring hybrid collaboration to life. Connect with your hybrid team the way it suits your workstyle to get work done securely and efficiently. AI-driven innovations make it easier than ever to drive better project outcomes.

Messaging

Avoid employee burnout by meeting less and still getting work done. Messages, contacts, files, content and meeting artifacts like whiteboards, recordings, and transcripts are stored in your spaces to save you time and boost productivity.

Empowered workforce

- Real-time translations: Select from 13 spoken languages for a meeting or webinar, which can then be translated into more than 120 other languages.
- Personal insights: A personalized dashboard for building better connections, giving insights into your meeting patterns and focus time, and improving your work-life balance.
- Custom dictionary: Capture industry and corporate specific lingo for more accurate closed captioning and transcripts, so everyone is always on the same page.
- Public spaces: Cultivate a sense of community and shared culture by allowing everyone to create and join spaces around any topic from corporate announcements to niche hobbies.
- Scalable grid layouts: Enjoy even more ways to personalize your meeting experience, including seeing up to 81 video views at a time on the same screen.

Flexible workstyles

- Background noise removal: Join meetings and calls without worrying about noisy keyboards, doorbells, or people talking in the background.
- Voice optimization: Isolate and choose between your own voice or multiple voices in a meeting, while still removing all other background noises.
- Move meeting to mobile: Transition your meeting from your desktop to your phone without disruptions or echo by simply scanning a QR code.
- Mobile camera share: Empower frontline workers, trainers, and teachers to collaborate on the go using their smartphones to view and annotate on live camera feed.
- Apple CarPlay: Check your calendar, attend meetings and listen to recordings while in your car with our seamless integration.

Frictionless workflows

- Embedded apps: Enjoy access to an extensive app ecosystem from within Webex, including popular third-party apps like Miro, Salesforce, Mural, and more.
- Whiteboarding: Effortlessly express your ideas anytime, with anyone, and on any device through digital two way whiteboarding with, easy access to all your boards in one centralized location.
- Meeting recordings: Change recording layouts, skip to active speakers, and create chapters to make watching recordings more efficient than ever.
- Global federated identity: Collaborate with people outside your organization without friction while complying with your corporate data privacy and protection policies.
