

What Surface users are saying

Employees

"I love the Microsoft Surface Go 2. I love the fact that **it's small and it's light** and I can unplug it and take it into the office with me or I can unplug it and sit on my sofa on a video call."

Michelle Barnett
Service Relationship Manager

"I'm a really big user of a lot of the ease-of-access software. I have a visual impairment and I'm quite sensitive to sudden bright lights. **It just helps me to do my work more efficiently.**"

Philip Heritage-Vivers
Business Development Worker

"Surface has **excellent battery life. I can use it for six hours continuously**, which supports my daily work requirements very well."

Li Qianyu
Nationwide Tech Support

IT

"Microsoft provides all of the services and defenses we need for ourselves and our customers **on the same platform.**"

David Grambicka
Senior VP of IT

"The innovative IT system **boosts a sense of connectedness** and belonging in employees. It's all from **enhanced accessibility** and collaboration **without security concerns...**"

Yeong Gu Jang
Head of IT Planning Department

"[Windows Autopilot and Microsoft Intune] has transformed what we've been able to do as a comparatively small team. We're configuring policies in the cloud to **easily manage** all 800 [Surface] devices...we are a very lean team and this **has absolutely transformed the way we operate.**"

Ed Spick
Director of Information & Technology Services

Federal agencies

"The Microsoft Surface Laptops stood out as a **secure, professional, highly functional device** that would enable our colleagues to work from home, stay in touch, and **work together effectively.**"

Dave Martin
Chief Technology Officer

"We began using Surface devices because they were **robust and flexible**. It (Surface) had to check a lot of boxes, both in physical features and the ability to support our experiments. And as our payload has evolved over nearly a decade, **Surface Pro has evolved and added valuable new features.**"

Jordan Callaham
Laboratory Manager

"[Surface] meets the use cases here. **They're ergonomic, lean, and mobile.**"

Tolu Thomas
Director of End User Computing Services
