## Improve the way your employees work

Business is about pushing forward. You want to do more, see more, accomplish more. You need your technology to help your business get there. By using multiple monitor setups with two or more displays, your employees can utilize the extra screen real estate to become more efficient and productive. Enhance your employee's multi-monitor setup with USB-C® docking monitors, a clean desk solution designed to connect and power your peripherals. Equip your team to view projects, data, and information all at once across multiple screens. Not only are the benefits like cutting inefficiencies and boosting productivity great for business, multiple monitors can have a noticeable effect on individual users. With a multi-monitor setup, employees can customize the way they work to their own styles, organizing programs and windows to optimize their performance.

### Increase productivity

Productivity can be increased by 31% or more with multiple monitors<sup>1</sup>. Improve the speed and ease in which your employees perform their daily tasks. From the executive suite to the front desk, multiple monitors help employees work more efficiently.

### Expand the on-screen workspace

Make it easier to tackle multitasking across programs. Multiple monitors allow employees to assign one program to each screen or divide larger screens into sections. This is a significant benefit for workers that alternate between screens frequently, such as graphic designers, stock traders, or customer support representatives.

### Improve collaboration

Easily chat or video conference with clients and coworkers online, using one screen for the discussion while working on the other. And when you collaborate in person, you can share your content in full size on one screen without having to minimize or close any other programs.

### Speed up access to vital information

Help your workforce get more done in less time. Employees can dedicate the additional screen space to the files and programs they access the most, such as email or work chat rooms.

## Multi-Monitor Hubs and Setups

With more employees using laptops and other mobile devices, a multi-monitor hub offers an easy way to combine the mobility of a laptop with the productivity benefits of a stationary workspace.

### USB-C® Docking

Give your employees an advantage in the office with easy connectivity, ready peripherals, and a cleaner desk. Laptop ports are disappearing in favor of smaller, lighter devices, so make sure your employees have the connectivity they need. Choose a desk dock like the HP Thunderbolt Dock to connect multiple monitors and peripherals without worrying about ports. Or choose a docking display, like the HP E27d G4 Docking Monitor, that connects all your devices and transfers power, video, and data over USB-C™ without adding more clutter or cables to the mix.

### Productivity

Gain significant screen real estate and give employees room to customize their workspace and organize their windows. And make detailed work, such as editing images or creating large spreadsheets, easier and faster with larger, high-resolution displays, like the HP Z27 4K 27-inch Display.

### Portability

Create a dual-monitor workspace almost anywhere with the HP EliteDisplay S14 Portable Monitor or HP E14 Portable Monitor, powered straight from the laptop via USB-C® connection for easy power, video, and data transfer with only one cable. It delivers multi-monitor productivity in a foldable, mobile-ready design for the remote or traveling professional.

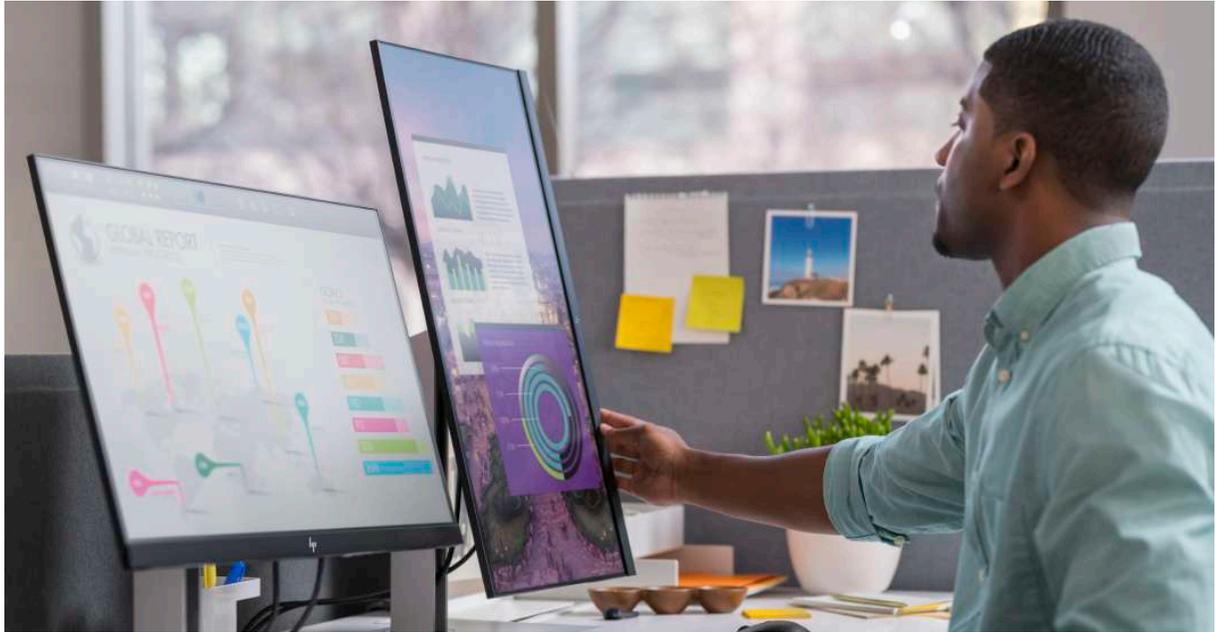

## Wellbeing at work

Improve employee ergonomics with HP E Series Monitors and Z Displays in a multi-monitor setup. 73% of employees state they experience neck, back, or shoulder pain at least occasionally when working on their work PC.<sup>2</sup> With height, tilt, swivel, and pivot adjustments, employees can adjust the monitors for a comfortable, ideal view for any project or task. Studies suggest that designing workplaces to support the holistic wellbeing of people can amplify employee engagement and satisfaction.<sup>3</sup>

## Drive productivity through innovation

### HP Micro-Edge Bezel Displays

Create stunning, uninterrupted views with micro-edge bezel displays that offer the least gap between screens. These monitors tile together seamlessly thanks to an ultra-thin bezel on three sides.<sup>4</sup>

**Figure 4.** A man uses an HP E27q G4 QHD Monitor, HP E27d QHD Advanced Docking Monitor & HP EliteBook 850 G7

### HP 4K and Quad-HD Displays

Maximize your content and fit more information on-screen without losing clarity. The ultra-high resolution of 4K and Quad HD displays means more pixels for sharper images and fonts by providing a more realistic depiction of images on screen.

**Figure 5.** HP E27d G4 Advanced Docking Monitor connected to HP EliteBook

### Easy Connectivity

You don't always need multiple connections to use multiple monitors. With USB-C® or Thunderbolt connections, you can

connect your monitors with a single efficient cable that transfers data, video, and power for an ultimate clean desk solution. With DisplayPort™ technology, employees can daisy-chain their monitors together in a sequence on select HP displays. Employees can also easily connect to a desktop, notebook, or docking station directly.

### Think Larger

Have all the benefits of a multi-monitor setup in one display with ultrawide and super ultrawide monitors without the desk clutter. Ultrawide and super ultrawide monitors can increase productivity up to 40% over a laptop<sup>5</sup>. Choose the Z38c 37.5-inch Curved Monitor or the S430c Curved Ultrawide Monitor for maximum screen real estate.

## Who can benefit from using multiple monitors?

Mobile Trailblazer

Office Navigator

Cloud Native

**Mobile Trailblazer:** Professionals who are always on the move and demand portable and mobile solutions so they can plug in wherever and whenever they need to.

**Office Navigator:** Users who thrive in office environments, processing, creating, and collaborating across teams. They demand docking, privacy, and multitasking solutions.

**Cloud Native:** Users that embrace constant connectivity for access to their primary workflows, and demand to easily navigate large documents and spreadsheets and work in multiple applications side by side.

Creative Pro

Power User

Frontline Hero

**Creative Pro:** Users with complex creative workflows who demand high performance, color accuracy, and ability to work in different applications or windows side by side.

**Power User:** Professionals who demand ultimate performance and mission-critical reliability on highly customized devices for software development, data analysis, product design, and engineering.

**Frontline Hero:** Users that often serve as the face of an organization, needs reliable and stylish technology provide great customer-facing service

## It's time for a multi-monitor setup

It's time to make your multi-monitor setup a reality. HP provides an array of monitors to best fit your business needs, plus accessories to achieve your ideal set-up.

### HP Z Displays

Delivers the best of everything for power users, from outstanding image performance to cutting-edge color accuracy from screen to screen; ideal for mission critical applications that call for maximum visual performance.

### HP E-Series

Leading ergonomic adjustments allow for height, tilt, swivel, and pivot adjustments for great viewing angles and a truly comfortable set up. Also includes low blue light settings, like HP Eye Ease in select monitors.

### HP P-Series

Deliver essential presentation features and connectivity in an affordable, quality set up that is ideal for the budget-conscious business.

## HP Accessories for Multi-Monitor Setups

### HP Wireless Premium Keyboard

Boost your productivity, save space and ports, and work comfortably at your desk or across the room with the elegant, redesigned, anodized aluminum-trimmed HP Wireless Premium Keyboard.

**Figure 13.** HP Wireless Premium Keyboard, HP Wireless Premium Mouse, HP Thunderbolt Dock and HP Mini Dock

## HP Wireless Premium Mouse

Create a sleek, professional, clutter-free workspace and give yourself room to move around with the HP Wireless Premium Mouse, which integrates seamlessly with your HP setup.

## HP Thunderbolt Dock

Reinvent docking and boost productivity with our most versatile Thunderbolt™ dock, the small, sophisticated HP Thunderbolt Dock G2. Designed for workspace flexibility and network manageability<sup>6</sup>, it delivers USB-C<sup>®7</sup> device connectivity and optional integrated audio.<sup>8</sup>

## HP Mini Dock

Be productive on the go with streamlined, pocket-sized port expansion that's fashionable and functional. The HP USB-C<sup>®</sup> Mini Dock has a modern, textured design and packs pass-through charging<sup>9</sup> and data, video, network, and device connectivity<sup>10</sup> into a compact, portable dock.
