ESET
Digital Security
Progress. Protected.

WHY ESET?

ESET is well established and continues to grow

400,000+ Businesses

110 million+ users

201 countries and territories

234 distributors
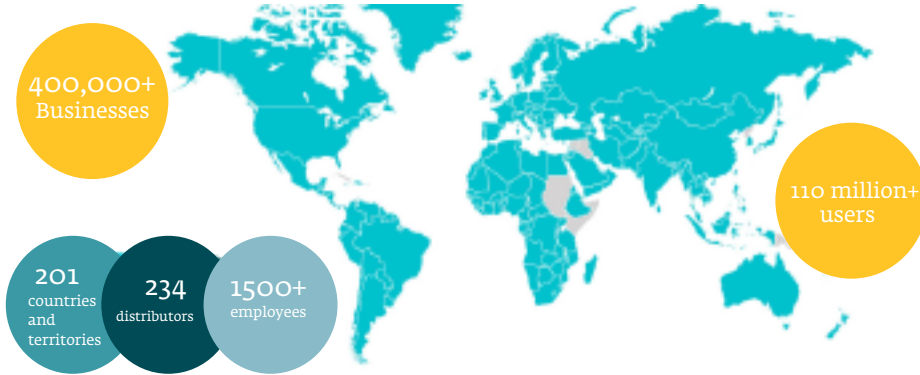

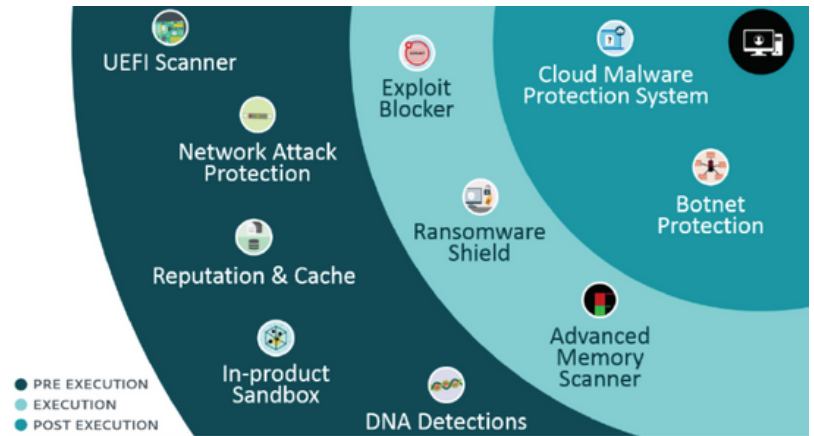

1500+ employees

Over 30 years ago, in 1987, ESET started with just 2 programmers. We have since grown to over 1600 employees worldwide. Due to the company being built by programmers, we have never left our development roots—over 1/3 of our employees are in R&D. This important focus helps us to develop new technologies and stay ahead of malicious authors.

30 30 YEARS OF CONTINUOUS IT SECURITY INNOVATION

ESET protects you through the entire malware cycle

ESET protects against malware throughout the entire lifecycle, before, during and after execution. This is a very important component, because malware sometimes looks completely benign due to encryption, obfuscation, or other concealing methodologies.

A file may look completely normal, but then 6 months down the road, it gets a communication from a malicious server and completely changes its payload.

UEFI Scanner

Network Attack Protection

Reputation & Cache

In-product Sandbox

Exploit Blocker

Cloud Malware Protection System

Ransomware Shield

Botnet Protection

Advanced Memory Scanner

DNA Detections

- PRE EXECUTION
- EXECUTION
- POST EXECUTION

Our products and technologies stand on three pillars

ESET LiveGrid
Whenever a zero-day threat such as ransomware is seen, the file is sent to our cloud-based malware protection system—LiveGrid®, where the threat is detonated and behavior is monitored. Results of this system are provided to all endpoints globally within minutes without requiring any updates.

Machine Learning
Uses the combined power of neural networks and handpicked algorithms to correctly label incoming samples as clean, potentially unwanted or malicious.

Human Expertise
World-class security researchers sharing elite know-how and intelligence to ensure the best round-the-clock threat intelligence.

IS YOUR CUSTOMER RECONSIDERING THEIR CURRENT SECURITY PROVIDER?

With the global security landscape changing daily, ESET provides stability and a name you can trust. ESET will buy out your customer's current contract with another provider.

*Only available from your local partner or reseller

WHY ESET MANAGED DETECTION AND RESPONSE?

Together with our products, ESET's Managed Detection and Response creates a complete security solution that will:

- Provide effective help in the investigation of incidents and security challenges
- Perform robust analysis of potentially harmful files
- Implement response and remediation steps to ensure business continuity

CUSTOMER BENEFITS AND PROMOTIONS

CUSTOMER BENEFITS

- ESET Solutions provide multiple layers of protection for your networks, data and employees.

- ESET has a full range of solutions, including cost-efficient solution bundles – ESET PROTECT

- ESET Professional Services - a catalog of defined services, from implementation and customization to training and support.

- ESET provides FREE US based Technical support to customers.

CUSTOMER PROMOTIONS

ESET has great deals for new customers, upgrades and vertical markets.

- 20% off ESET PROTECT Entry or Advanced Cloud for new customers. Click here for Entry promo details. Click here for Advanced promo details.
- Up to 30% savings on upgrades for current customers. Click here for details.
- 30% discount for GOV/EDU/Healthcare/Nonprofits. Click here for details.
- 95% Off ESET Cybersecurity Awareness Training with the purchase of any ESET PROTECT bundle. Click here for details.
