

Spectacular Convenience. Remarkable Compatibility.

Displays designed for what moves you

Lenovo makes meeting the business challenges and tech needs of your dynamic, digital-first workplace simpler. Our broad portfolio of compatible solutions is built for modern business—and visuals and accessories are critical to keeping productivity flowing. That's why we're constantly creating purposeful innovation with maximum flexibility and connectivity that works seamlessly together—like our PCs and stunning displays featuring Natural Low Blue Light (nLBL).

Get More ROI from Your Tech

With our unmatched reliability and durability

Our displays are tested for optimum compatibility and performance by the same team who assures the quality of our legendary ThinkBooks. How do we measure effectiveness and durability? Our team utilizes these rigorous challenges:

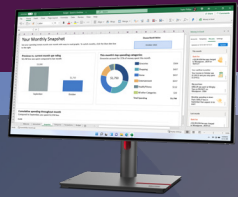

- PC test: Test monitors while connected to actual PCs, NOT just video generators
- 48-hour extreme temperature and humidity tests
- Cold drop test
- ESD (Electrostatic Discharge)—more than industry standard
- Extreme vibration
- Button life testing: over 30k button presses
- Color Uniformity

Superior, Energy Efficient Displays for Hybrid Work

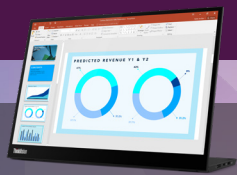

Trust the 40-year legacy of ThinkVision

Whether your team is onsite, remote, or hybrid, Lenovo is your trusted partner for tech that powers effective work. There is no one-size fit for all demands of the modern work, which is why Lenovo ThinkVision displays are tailored to suit today's broad spectrum of work environments. To create a greener, more sustainable world and reduce carbon emissions, our displays are UL GREENGUARD certified. We also constantly push our limits by using recyclable materials on our monitors to reduce environmental impact.
