

Efficiently empowering your IT resources to do more

Simplified device management with top-notch security

Need some assistance to deploy Xerox® ConnectKey® Technology-enabled Multifunction Printers (MFP) across a national or local network? Let us help your IT departments simplify the process and ensure the security of your printer fleet. Configure and manage your devices with ease while reducing costs and saving time.

TAKE A LOOK

Xerox® ConnectKey® Apps Streamline, transform, and grow

- Simplify and shorten everyday tasks
- Extend the capability of your MFP to do more
- Align your MFP to specific business processes
- Download apps from the Xerox App Gallery and get the job done
- Eliminate the need to invest in a dedicated server, PC, or IT resource

With a Xerox® ConnectKey® Technology-enabled MFP, you can —

- Enjoy a consistent user experience regardless of the model with a common look and feel
- Learn once and apply fleet-wide common functions
- Simplify the setup with new installation wizards to get started with no IT support
- Minimize user training and save time

Xerox® CentreWare® Web Software Discover, manage, and monitor

- Discover and manage your devices from a simple dashboard
- Manage installation and configuration settings
- Remotely monitor and troubleshoot to resolve issues quickly
- Perform periodic maintenance tasks
- Ensure efficient fleet management
- Gain required insight with comprehensive reporting

Xerox® Quick Link App Click, connect, and print

- Send an email or scan a QR code to connect your MFP to your PC or mobile device
- Install print drivers in a remote setting
- Set up your MFP without the IT team
- Start printing with ease
- Free up your IT team's time

Comprehensive Printer and Data Security Prevent, detect, and protect

- User Authentication to allow only authorized staff to access the MFP
- Role-based Access Control to let staff see what you want them to see
- Audit Trail to track every action by each user
- Centrally implement fleet-wide security policy
- Create a baseline security policy aligning with your IT requirement
- Identify and remediate non-compliance
- Secure print output using a PIN or Card Release system

Web-enabled Remote Control Panel View, operate, and troubleshoot

- Access your MFP's control panel remotely from a web browser — on a computer or mobile device
- Gain real-time and interactive access to your device
- Resolve user issues from anywhere and from any device
- Reduce the time needed to manage your MFP
- Maximize the productivity of your workforce

Limited or no IT resource, manage and monitor your MFPs efficiently
