Chrome Education Upgrade

Unlock the capabilities of Chrome OS and give educators the freedom to deliver better learning outcomes

IT administrators working in education face the same challenges as any other industry: finding the right path to digital transformation while juggling security, scalability and cost.

Chrome Education Upgrade leverages the full capabilities of Chromebooks and Chrome OS to counter rising teacher workloads, free up IT resources and give educators more time to focus on learning outcomes – without compromising security.

> "I would say that we are saving more than 70% of our time on managing the devices. If we were going to do this with another device, we'd have to almost double our staff. We have all of these devices now, but we don't hear people talking about managing them."

The next frontier in education

Put admins in the driver's seat with Chrome Education Upgrade

Managed access

Take control of what resources users can access. Block end users from logging into Chromebooks, restrict access to certain sites and content, and enable identity-free usage for shared devices.

Simplified deployment

Provide IT with access to device policies and fleet oversight capabilities for both school-issued and student-owned devices, all from the cloud-based Google Admin console.

Advanced security

Lost and stolen protections prevent data theft by remotely disabling devices, ephemeral mode wipes user data upon logout, and persistent enrollment ensures devices are always enrolled to your domain.

24/7 IT admin support

All this, with the added benefit of Chromes OS troubleshooting assistance. Call Google at any time if an issue comes up at no additional cost.
