Breaking the Data Bottleneck for a More Agile and Intelligent Edge Computing Platform

As a major carrier of IoT businesses and services at China Mobile, China Mobile Internet of Things Co. Ltd. provides innovative solutions to intelligent IoT for manufacturing, energy, power and environmental protection by integrating advanced technologies such as 5G, edge computing, cloud computing and artificial intelligence. By introducing high-performance storage products such as Intel® Optane™ SSDs, China Mobile's OneNET Intelligent Edge Suite (OES) platform delivers low latency, high-security data access, storage and processing. It can efficiently handle complex requirements in enterprise IoT scenarios with multiple clouds, heterogeneous structures and massive data and offers numerous benefits.

Products and Solutions
Intel® Optane™ SSDs

Industry
Telecommunications, Internet of Things

Organization Size
1,001-5,000+
