

# CASE STUDY

## Nursing and Rehabilitation Centers

Acer Chromebase CA2412  
Acer Chromebook CB315-4H

### CHALLENGE AND SOLUTION

- Devices with webcams for facial recognition were needed for staff throughout centers to record breaks, punch in/out of shifts, and view punch history.
- Dayforce/Ceridian software is a common solution in healthcare to accomplish these tasks and runs optimally with ChromeOS.
- Chrome Enterprise Upgrade provides ease of manageability and inherent security.
- The customer purchased 145 Chromebase 2412 devices for time clocks across all centers and over 200 Chromebook 315 devices for staff personal laptops.

### WHY ACER

- Acer offers a touch Chromebase for healthcare facilities to mount on walls. Staff can easily access the devices via touch in breakrooms, kitchens, and kiosks throughout the centers.
- Acer ChromeOS devices run seamlessly and securely.
- The 24" Chromebase 2412 is the perfect size and fit for front-line employees.
- The 15" Chromebook 315 offers power, security, durability, and mobility for healthcare workers.
