Promotion description

For a limited time, save 25% on the Cisco Data Center Networking Day 2 Ops add-on license and receive virtual Nexus Dashboard and learning partner training with your purchase.

Add on to your Cisco DCN Advantage or Essentials license to unlock the full capabilities of the Cisco DCN Premier licensing tier.

Proactively operate and automate your network with visibility

More diverse and containerized applications and services continue to come onto the network, increasing the complexity of managing widely distributed data over on-premises, edge-cloud, and public-cloud data center locations.

Organizations cannot afford to be reactive to any issues related to managing, monitoring, and troubleshooting their networks and business-critical apps.

To help our customers overcome these challenges, **Cisco Nexus® Dashboard** brings together unified proactive operations and actionable insights across hybrid cloud networks, enabling full lifecycle network operations from a single pane of glass.

Terms and conditions

Promotion ends July 29, 2023. Available globally. All Cisco [Data Center Networking licensing](#) customers are eligible for this promotion. Customers must have or create a [Cisco Intersight™ account](#) and [claim their virtual Nexus Dashboard on Intersight](#).

Additional terms and conditions may apply. Subject to product availability in local countries.

This promotion is eligible to be combined with other discounts and promotions.
