

# Four ways Azure VMware Solution saves you money

Moving your VMware workloads to Azure is a great solution for business agility and flexibility. And with Azure VMware Solution (AVS) it also makes financial sense.

## 1 AVS includes VMWare Cloud Foundation (VCF)

AVS is a fully managed service that includes VCF technology. If you have already renewed with VMware, AVS now supports portability of your VCF licenses.

## 2 You can lock in price for up to five years

Using Reserved Instances (RI) for AVS enables you to lock in pricing and discounts for one, three, or five years. For a limited time, you can get an additional 20% off the one-year RI.\* When you modernize to IaaS, your RI pricing stays the same.

*\*Special offer: One year and five-year RI for AVS ends on June 30, 2025*

## 3 You can get unmatched cost savings as a Microsoft customer

Azure Hybrid Benefit gives you the ability to use Windows Server and SQL Server on-premises licenses with Software Assurance to significantly reduce costs. Plus, you can get free Extended Security updates for Windows Server and SQL Server 2008, 2008 R2, and 2012.

Save up to  
**80%**  
when you combine  
Azure Hybrid Benefit with  
Azure Reservations.

## 4 Azure VMware Solution can help optimize your IT costs

**16%**

average savings of direct infrastructure-related costs with Azure.<sup>1</sup>

**37%**

average three-year cost savings when you run equivalent workloads on Azure.<sup>1</sup>

**54%**

potential total cost of ownership savings on Azure versus running on-premises.<sup>2</sup>
