

# Professional audio improves the meeting experience in hybrid work

Not all audio devices are made equal

### Built-in audio

Speakers and microphones physically built into a desktop, laptop, or mobile device

### Consumer audio

Engineered to maximize your music and media experience for daily listening and activity

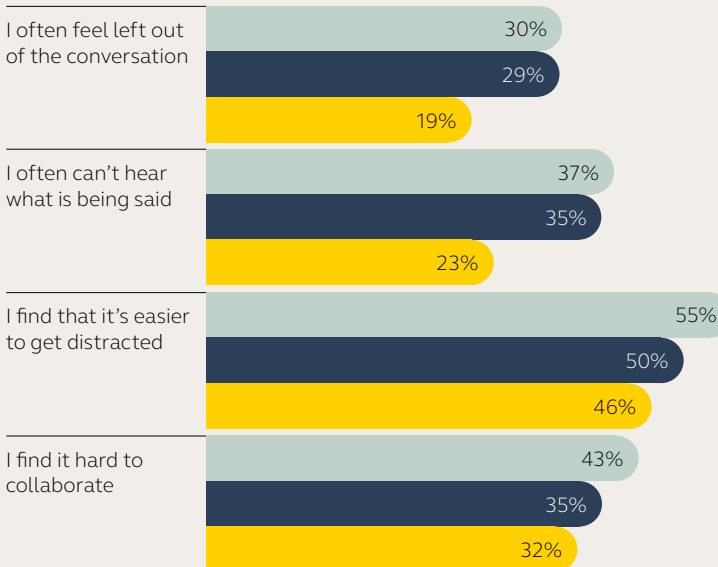

### Professional audio

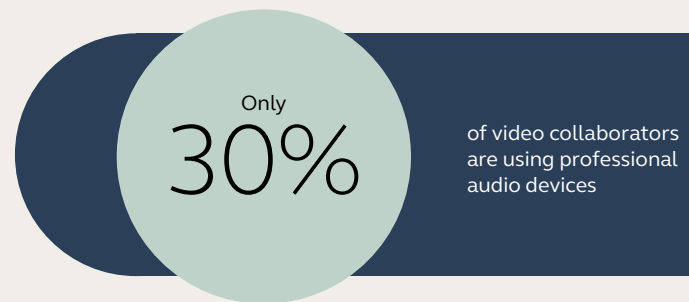

Engineered for high quality audio in professional virtual environments

## Professional devices improve virtual meeting experience

● Built-in audio   
 ● Consumer audio device   
 ● Professional audio device

## Employees want standardized, professional audio devices

## 3 in 4 employees say that professional audio devices would help everyone participate equally in hybrid meetings
