CISCO Meraki

Save time, money, and resources
with MV smart cameras

What makes an outstanding physical security solution?

The answer goes well beyond just providing increased visibility and decreased spending—especially in today's climate. Meraki MV cloud-managed smart cameras provide a **flexible, cost-effective, and efficient** solution to physical security. Not only will Meraki smart cameras substantially save you in installation costs and ongoing maintenance expenses, they also make the process of finding and sharing footage easier than ever.

Check out a few of the benefits realized by customers using Meraki cloud-managed smart cameras:

43% **ROI**
Over three years, with a payback period of just ten months.

75% **savings on maintenance costs**
Reduce time spent maintaining cameras, configuring software, and updating firmware.

60% **reduction of video storage costs**
Each MV camera has onboard storage—no NVR or DVR needed.

98% **time savings to access and share video footage**
Turn hours of work into mere minutes by easily identifying incidents for quick response and immediately sharing footage.

Reduce energy costs by up to **30%**
With less hardware needed, minimize the footprint of equipment rooms and scale back energy usage.

> We are getting greater business value with Meraki....We're paying less money for the cameras that we're getting through Meraki and we're spending less to get them implemented."
