CHECK POINT

Solving the #1 Email Security Issue

With Check Point Email Security

THE #1 TOOL AGAINST BUSINESS EMAIL COMPROMISE

Solve These Email Security Problems

Blocks Ransomware & Other Malware

Reduces Costs & Security Management

Covers all Business Comms, including Slack and Teams

Why Check Point Email Security

- Check Point Email Security is the **most advanced** and fastest- growing next gen email security solution avail-able today.
- Check Point Email Security is designed specifically for **cloud email** environments.
- Check Point Email Security is the ONLY solution that **prevents**, not just detects/ responds to, threats from entering the inbox.
- Check Point Email Security is **designed to work with** O365, G-Suite, Slack, Teams, and more.
- Check Point Email Security is **compatible** with all other networking and security tools.

Check Point Email Security Differences

- Patented AI technology that stops attacks before they land in the inbox.
- 5-minute set up. Nothing to deploy.
- Works in parallel with existing tools.
- Works with all cloud email and collaboration platforms.
- Provides both prevention and post-delivery protection.
- Reduces phishing in the inbox by 99.2%.

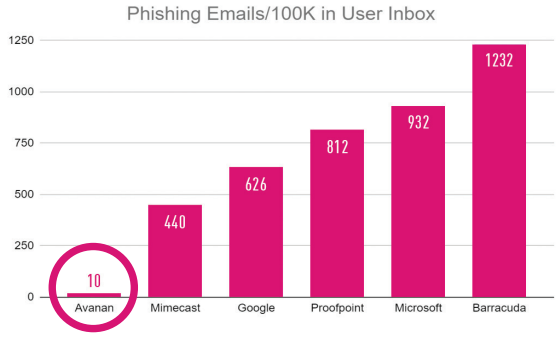

Try it first! Set up a POC to see what your current environment is missing.

A demo take less than 5 minutes. The POC sets up in 15 minutes.

A POC shows results immediately, highlighting current missed threats and attacks.

Did you know:

- That **email is the #1 method** used by threat actors use for access to companies and standard malware protection doesn't provide sufficient protection?
- That Check Point Email Security **compliments Microsoft O365** and G-Suite? Plus, their default security doesn't cut it?
- That Check Point Email Security can work with legacy installs?
- The next most efficient product on the market let **440% more threats** into the inbox?
- All other email security solutions incorporate some element of human intervention, which takes more time and is more fallible. **Check Point Email Security's AI is always faster**.

Security Check Point Email Security can run in parallel with these other email security products.

Check Point Email Security works with Microsoft O365 better than all other Email security solutions on the market today. Check Point Email Security is the only email security solution that sits beside O365, G-Suite and email and collaboration suites without any element of integration competition.

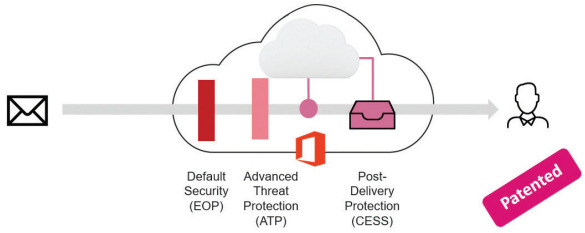

The Check Point Email Security Architecture

Our Architecture

- Embedded within O365 as a layer
- Last line of defense before inbox
