- Use robust analytics to recognize trends and improve efficiencies
- Easily automate workflows with drag-and-drop configuration – no need for coding
- Help enforce document privacy, audit, and compliance standards

HP Intelligent Workflows

The challenge

Organizations need quick access to information while keeping data secure. Paper-based and/or manual processes introduce inefficiencies that can reduce productivity and increase costs. Challenges include:

- Wasted time and reduced accuracy due to paper-based workflows and tedious manual processes
- Difficulty meeting privacy and compliance standards
- Inability of remote workers to find, access, and share the information they need
- Inefficiencies due to systems that can't connect to each other

The solution

HP Intelligent Workflows empowers your entire workforce with cloud-ready, intelligent, automated workflow and document management solutions. Distributed workteams can collaborate effectively and efficiently using digital workflows, regardless of geography or timezone.

Smart, secure content management allows information to flow effortlessly across the organization. A drag-and-drop, no-code workflow designer lets you create intelligent custom workflows, remove points of friction, and streamline operational processes by automating tedious tasks. Enforce complex privacy and security standards needed to help comply with, audit, and document complex regulations such as HIPAA, FERPA, PCI, and SOX without placing an extra burden on IT teams.

This solution's workflow automation is easy to design and deploy, can automate virtually any process, and has inline integrations with other systems, including e-sign systems like DocuSign.

The HP Intelligent Workflows Solution "empowered us to unburden our staff from time-consuming manual duties that filled their days. Now, our employees can spend more time on tasks that matter most for the community we serve."

CONTENT MANAGEMENT AND ACCESSIBILITY

In a modern enterprise business, smarter content management leads to better outcomes. With HP Intelligent Workflows, ordered information is totally secure yet accessible from anywhere and easily integrated into existing workflows. Meta-tagged, searchable documents are stored in a single place with simple configuration for permissions and security settings.

IMPROVED PRODUCTIVITY

Give teams access to the content they need right at their fingertips. Users can access files, route documents for review and approval, create forms, collect e-signatures, see pending tasks, and assess project status and results from anywhere.

FLEXIBLE AND SCALABLE

HP Intelligent Workflows offers comprehensive integration platform and API capabilities that make it easy to connect to common CRM, human resources, financial, ERP, enterprise, and student information systems. It's integrated with Single Sign-On (SSO), and a fused interface provides access to data from one screen.

Count on this highly scalable solution to grow with your organization, with flexible licensing options and the ability to meet the workflow automation needs of virtually any industry.

CUSTOM WORKFLOWS

Collect information from virtually any format—email, fax, paper documentation, forms, and more. Drag-and-drop configuration lets organizations automate even the most intricate tasks without the need for coding. Create dynamic rule sets to route data and trigger operations.

SECURITY AND COMPLIANCE

Easily track and analyze documents and processes. Customizable dashboards and access to key analytic metrics help you evaluate efficiencies, recognize trends, and anticipate future needs. Reporting can also help enforce compliance standards, provide audit information, and document privacy and security requirements.
