

Security, compliance, productivity. Accelerated.

The productivity vs security problem

Balancing employee productivity with tight security poses significant challenges, especially in today's work-from-anywhere-world.

The [Forrester TEI Study](#) of the Microsoft Intune Suite highlights a common scene: overworked IT and security teams juggling multiple tools from different vendors, trying to fend off cyber threats while keeping everyone productive. It's a precarious situation that's far from ideal, leading to wasted time, frustrated employees, and a weak security posture.

Tough but worth it

Transitioning to and staying in a state of modern device management is hard but essential. Organizations that get there achieve a significant competitive advantage with heightened productivity, enhanced security, and potential savings of over \$2 million annually, according to Forrester.

Unlocking productivity, security & compliance

Devicie propels organizations using M365 into an optimal state of modern device management. Using its generative configuration engine, Devicie automatically builds and deploys a best-in-class Intune instance, tailored to an organization's needs. Through hyperautomation, Devicie maintains the optimal state and, with a no-touch-management approach for updates, policies, and controls, helps organizations achieve a zero-trust environment across all endpoints globally.

With Devicie, organizations with M365 achieve an optimal state of modern device management, increasing organizational productivity and strengthening their security posture, while freeing up IT and security resources.

Key benefits

Rapid deployment

Achieve a best-in-class Intune instance tailored to your organizations needs in hours, not months

Resource efficiency

Automatically maintain your Intune instance without the manual workload

Enhanced security

Leverage and instantly deploy cutting-edge technologies consistently for superior protection

Assured compliance

Automation to support consistent adherence to policies with the reporting to prove it

Zero touch provisioning

Achieve no-touch device setup and make hardware refresh cycles a breeze

Copilot catalyst

Unlock Copilot, backed by stringent security and compliance

The Devicie difference

Instant uplift

Devicie's generative configuration engine ingests company information to create a best-in-class Intune instance, tailored to an organization's unique needs.

Ideal state maintained automatically

Keeps an organization in an optimal state by automating the repetitive day-to-day tasks needed to ensure controls are applied, applications are updated, operating systems patched and more.

Alerts and remediation

Independently maintains the ideal system state outside of the M365 environment and actively monitors for deviations, ensuring control and swift corrective action.

Streamlined compliance and visibility

Provides comprehensive insights into the endpoint health of an organization, including OS patching, local administration controls, encryption, warranty, and applications – making compliance reporting a breeze.

Enhanced security posture

Delivers a security model that combines a set of prebuilt policies and configurations that elevate the security and efficiency of your M365 environment far beyond the default settings.

Independence from key resource churn

Ensures a robust and secure M365 environment, even in the face of staffing challenges. Devicie's hyperautomation means operations continue smoothly.

Outcome as a service

We deliver outcomes. From zero-touch setup to continuous monitoring and remediation, our solution ensures you stay in an optimal state of modern management without the manual workload.

"The challenge for us was keeping devices healthy and up to date; not because we don't have the skills, but because we don't have the time. It would have taken us at least 12 months to do ourselves what Devicie did in less than one."

"Devicie has been transformational and after the company-wide rollout onboarding new employees and setting up their devices went from taking several days to just 30 minutes and their experience was improved dramatically."

"Now that everything is on the same policy and it's automated, we don't really need to worry about when we're going to do an upgrade, it will just happen at an appropriate time. It's one less thing to worry about or to think about."

Choosing your path to modern management

Devicie elevates M365 management through tiered solutions, each designed to enhance your organization's efficiency and security:

Devicie D3: instant uplift into ideal state

For organizations with Microsoft BP and E3 licenses seeking immediate operational efficiency, D3 offers rapid deployment and automated on going maintenance. This ensures an optimal state of modern management is achieved and maintained without adding any additional workload to the team.

Devicie D5: elevated security and compliance

For organizations requiring advanced security and compliance, D5 extends D3's capabilities with enhanced security configurations and comprehensive compliance reporting. Ideal for organizations with Microsoft E3 or E5 licenses looking to have more comprehensive visibility and control.

Streamlining success

From months to hours, Devicie transforms the journey to modern management. We create a unique Intune instance through our generative configuration engine and roll it out globally across an organization's devices. This ensures an optimal state of modern management.

With Devicie, we efficiently handle continuous automated maintenance, monitoring, and remediation of Intune. This maintains an optimal environment without the need for constant manual intervention. Our transformative approach enables organizations to enjoy effortless cloud management, allowing them to focus on achieving their strategic objectives.

Achieve modern management with Devicie

Devicie is a MACC-eligible Microsoft Partner. We work with MSPs and MSSPs all over the world to enable people to work efficiently while ensuring device security is hardened and compliance is attainable. We'd love to share more about how Devicie can help your organization.
