The Challenge

Security programs are under pressure from demands across the organization. The attack surface area is growing from an influx of new devices and applications needed to grow the business. Clients are conducting stricter security due diligence, and requiring third-party certifications to prove their data will be secure. The security talent shortage is at an all-time high with an estimated 3.5 million unfilled jobs by 2021 according to Cybersecurity Jobs Report. You want to enable the business, but you are having trouble scaling your InfoSec program.

DEMYSTIFY & AUTOMATE YOUR INFOSEC PROGRAM

Tugboat Logic's Security Assurance Platform is designed to demystify and automate the various aspects of managing your InfoSec program, so you can scale and turn it into a business advantage.

TUGBOAT LOGIC SECURITY ASSURANCE PLATFORM
