

United States federal focus from Alcatel-Lucent Enterprise

Connected devices and equipment are changing government operations by using data analytics and connected objects to drive strategic decisions. Communications and networks need to be secure while operations are kept simple.

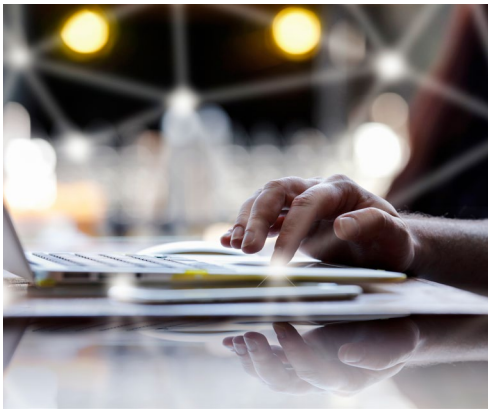

Alcatel-Lucent Enterprise is fully committed to providing networking and communications solutions and defense-certified equipment for the US Federal Government civilian and defense agencies.

Trusted experience

- More than 100 years experience and innovation
- Named Gartner Magic Quadrant Visionary for more than 15 years
- **A proven DoD partner for networking solutions**
  - ¬ *20+ years serving the US Navy with more than four generations of switches used in mission-critical environments*
  - ¬ Equipment deployed in all US military branches

A true technology partner

Safe and secure

- Independent verification and validation of Alcatel-Lucent Enterprise operating systems
- Software delivery: IV and V software delivered directly from independent third party
- Dynamic code diversification: Helps prevent attacks by loading software into different memory location every time the switch is rebooted
- Deep packet inspection to help protect against attacks

Protecting your network

Standards and certifications

- Standards-based solution: IEEE Standards to avoid vendor lock-in
- Common operating system across the entire switching platform
- **JITC Certified**: *On the DoD Approved Products List (APL)*
- FIPS-140-2 certified for encryption
- Common criteria
