

ThinkSystem 30 | Lenovo Accelerating the New Era of IT

Kroger

Retail: Kroger needed optimized performance, security and management while running AI at the edge. Kroger chose Lenovo AI Edge servers to analyze real-time data and turn activity at checkout into instant insights. Now, over 75% of self-checkout errors can be corrected without employee intervention. [Learn More](#)

Rosti

IT Infrastructure: Rosti Group wanted to overhaul the company's IT infrastructure and develop an entirely data-driven and cloud-first IT approach. They implemented Lenovo ThinkAgile MX in partnership with CLOUDEON to streamline their IT infrastructure. [Learn More](#)

eodc

Cloud: Earth Observation Data Centre accelerated 50% faster satellite data acquisition to support flood warning systems and save lives. [Learn More](#)

Konecta

Remote Work: Konecta Peru leveraged Lenovo TruScale to ramp up remote work capabilities during the COVID-19 crisis by running workloads in its own data center, **deploying 1000 users** and ensuring data and security compliance. [Learn More](#)
